

# INTELLIGENT CONTENT NETWORK

## LARGE WORLDWIDE INSTITUTION

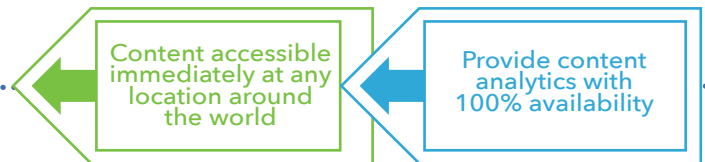

### THE CHALLENGE

60 million customers 80 petabytes of data and no way to efficiently find information. Lawsuits and investigations ensued when ineffective systems failed to meet strict business continuity requirements. Pretty big deal.

### THE APPROACH

Systemware's intelligent content network - contextual, curated access to global customer data interoperating between existing systems. With content analytics thrown in, this customer also discovered new value in their information.

### THE RESULT

We reduced audit requests from weeks to seconds, even subseconds, **saving more than \$10 million annually.**

For more than 35 years, we've been working to develop and deliver creative, innovative software access to actionable information - anywhere.
