

Systemware Regional User Conference

Join Systemware in Dallas this Fall. Here's why this event is for you.

CONNECT with like-minds in the industry and explore digital transformation topics with visionaries and forward thinkers who are leading us into the next generation of intelligent information management. **LEARN** how our current content services solution, Systemware Content Cloud, and our roadmap can help you achieve your present and future initiatives. **COLLABORATE** with your Systemware family and a host of subject matter experts that can help answer questions on current projects as well as explore the possibilities of tomorrow's projects.

4 Reasons to Register

Presentations - it's always great to know someone else has experience with similar initiatives. It's even better if you can hear about their strategy and best practices as well as see technology presentations.

Peer discussions - discuss relevant topics including ECM rationalization, going beyond ECM to content services, migration strategies, cloud deployment and more. What are your barriers? How do you get from planning to execution and more? Better yet, hear from those that are leading, innovating and forging new paths in digital transformation. Get their insights behind their corporate vision and how they plan to achieve it. Ask questions that could help you with your organization's initiatives.

Speak or lead - request to present your project or speak about an innovative strategy. Your involvement helps drive the conversation and could drive roadmap discussions.

Subject matter experts - not only hear from the Content Cloud experts at Systemware but take time to speak to them about your requirements. At Systemware, our roadmap focuses on clients' needs, and our software represents your direction.

Way to Get Approved

Create a justification letter - Start from our sample justification letter to show your manager what's in it for you and your organization. In the letter include an estimate of your potential cost to attend including registration fees plus travel and living expenses. When considering travel estimates, note that a reception will be held the evening prior to the event date. Finally, set a meeting to discuss your attendance emphasizing the impact your organization can have on the Systemware roadmap.
