

Vision P2P QR Quick Setup

With P2P QR connection there is no need to set any ports, worry whether or not your uPnP is enabled within your router, do any port forwarding within your router or setup a DDNS name.

- Log into your NVR’s menu (default: admin/123456 or admin/1234567u)
- Right click your mouse and choose Menu/System/Network
- Under **TCP/IP** make sure “Enable DHCP” is checked off

TCP/IP	PPPoE	P2P	DDNS	3G/4G	Port	Port Mapping	Email	Multicast	FTP
Select NIC									NIC1
Enable DHCP		<input checked="" type="checkbox"/>							
IPv4 Address									192 . 168 . 2 . 80
IPv4 Subnet Mask									255 . 255 . 255 . 0
IPv4 Default Gateway									192 . 168 . 2 . 1
IPv6 Mode									Router Advertisement
IPv6 Address									fe80::4aea:63ff:fe61:ac39
IPv6 Prefix Length									64
IPv6 Default Gateway									::
MAC Address									48:ea:63:61:ac:39
MTU(Bytes)									1500
Preferred DNS Server									8 . 8 . 8 . 8
Alternate DNS Server									8 . 8 . 4 . 4
Internal NIC IPv4 Addr.									172 . 16 . 0 . 1

- Under the **P2P** menu, check off “Enable P2P” (Device Status will stay offline until account is register and device scanned)

TCP/IP	PPPoE	P2P	DDNS	3G/4G	Port	Port Mapping	Email	Multicast	FTP
Enable P2P		<input checked="" type="checkbox"/>							
Domain Name									www.star4live.com
Register Code									F1K15ORPWH8B5VAHB7F9LSVJ6
Device Status									Offline: The device has not been added to the cloud website. Please add the device first.

- On a computer, go to www.star4live.com and register an account (click Sign Up).
- Once you have registered, download the mobile app **Vision InVid** on your mobile phone
- Hit the menu button (three lines) in the top left hand corner, and choose **Devices**
- Hit the plus sign (+) in the top right hand corner and choose **Scan**
- Scan your barcode, then enter in a “name/nickname” for your device
- Hit the Save button (floppy disk icon) in the top right hand corner
- Go back to your NVR (**Menu/System/Network/P2P**) and you will now see your Device Status is “Online”

TCP/IP	PPPoE	P2P	DDNS	3G/4G	Port	Port Mapping	Email	Multi
Enable P2P		<input checked="" type="checkbox"/>						
Domain Name								www.star4live.com
Register Code								F1K15ORPWH8B5VAHB7F9LSVJ6
Device Status								Online
Username								invidtravis
Device Name								EJ NVR Test

Not connected? Here are some things to check

1. Make sure the physical connection between NVR and switch/router is made, and the cable is good(see if green link light is lit under LAN port)
2. DHCP may be turned Off within your router, you may need to disable in NVR and manually input your IP Address, Subnet Mask, Default Gateway and your DNS Servers (8.8.8.8 & 8.8.4.4)
3. Can you connect to the device via the LAN IP, whether it’s the DHCP address or the address you manually gave it (because DHCP was disabled) via the Internet Explorer to ensure it has network connectivity
4. Was the P2P definitely “enable” and saved, check back (Menu/System/Network/P2P)
5. Can you successfully login to your Star4Live account (www.star4live.com) to make sure the registration was a success
6. If all else fails, you can always reach out to the InVid Tech technical Support Team

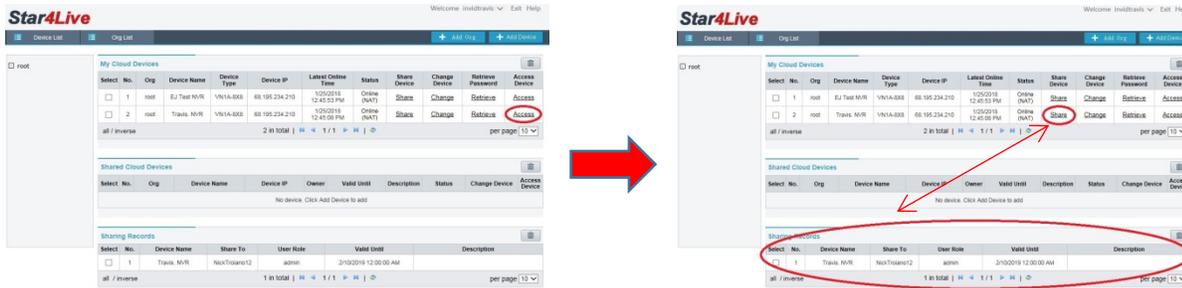

Viewing your Vision Device Online or from Mobile App

Viewing from your Web Browser (Internet Explorer):

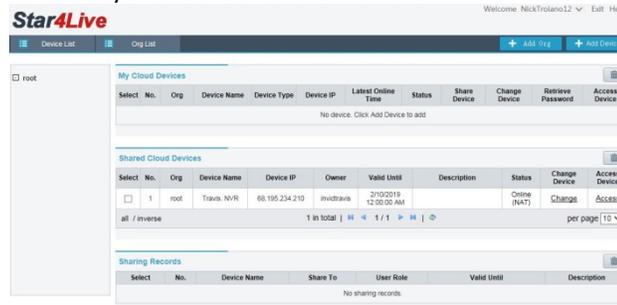

- Go to www.star4live.com

- Login using your email address or user name as well as your account password (case sensitive)
- You will see your device(s) that are added to your account. Click the "Access" button and it will open a new tab bringing you to the Live View of that device.

- Please note, you can only add a device to one account. If you have multiple devices in your account and do not wish to share that login information, have your customer create their own account, then "share" that device to their account "email" used to register. When they log in, they will only see the device you choose to share with them.

Viewing from your InVid Vision mobile app:

- Open your mobile app and hit the menu button in the top left hand corner
- Choose "Live View"
- Hit the Camera Icon in the top right hand corner
- Select your device, then hit "Start Live View"
