**Treatment of Male Stress Urinary Incontinence**

Macroplastique is indicated for SUI often found in men following TURP or Radical Prostatectomy.

- Demonstrated safety and efficacy
- Minimally invasive procedure
- Immediate results

**Minimally Invasive**

- Significantly less invasive than the alternative treatment options
- Provides immediate relief of symptoms
- Fast recovery and minimal complications

**Proven**

- Clinical success since 1991
- Documented long-term success\(^1\^-\(^7\)
  - Up to 5 year follow-up
  - Up to 80% success determined by urine loss (pad weight), reduction in pad usage, and assessment of patients’ perception of the outcome of therapy

**Cost Effective**

Significantly less expensive than current alternative treatment methods.

“There was an overall perceived [patient] satisfaction of 80%”\(^4\)”
