

RED HOT

Alkaline Presoak

DESCRIPTION

A lean and mean alkaline presoak that delivers great results. The beauty with this product is its simplicity. This product is an economical presoak that time and time again performs in the toughest conditions. It also doubles as a great tire & wheel cleaner or high pressure prep soap. Save on shipping and space when purchasing this as part of the EZ Presoak System.

USAGE INSTRUCTIONS

This product can be applied under low or high pressure. When applying it as a presoak application it is best applied under low pressure. In a touch free setting apply at 18-36:1 (10-20 drops). Allow to dwell before rinsing. In friction or self-serve applications apply at 48-75:1 (5-8 drops). Product can also be applied as a tire cleaner. Apply on low pressure through a CTA at 10-20:1 (20-30 drops). For application as a high pressure prep detergent consult your sales representative.
