

RUST INHIBITOR

Rust Inhibitor

DESCRIPTION

A corrosion inhibitor for underbody rust protection. This products applies a temporary barrier of protection between your car and the elements. This product is a must have where salt is commonly applied to de-ice the roads.

USAGE INSTRUCTIONS

This product is ideally applied with soft water to the underbody of vehicles. It can be applied in tunnels or in-bay automatics where undercarriage applications exist. For improved protection apply at 75-125:1. For more economical application apply up to 200:1.

FEATURES

- Protects ferrous metal from salt and water
- Improves undercarriage longevity
- Easy application
- Economical
