## Tire Dressing

---

### DESCRIPTION

User beware, sunglasses required after application! A product that truly lives up to its name, this product will wow customers. This oil-based silicone tire dressing is designed to be used in conveyor wash systems where tire dressing is applied mechanically through brushes, foam pads or cloth. Due to its unique blend of silicones this tire dressing reduces "sling" while creating unmatched gloss with minimal product usage. This product can also be applied by hand in detail shops.

### USAGE INSTRUCTIONS

This product should be applied directly to a clean dry tire for best results. When being applied automatically through an online applicator it is important to not overuse as it will promote sling. Roughly ½ ounce per car should be used. Controlling amount of product can be done by reducing pumping time and frequency.

### FEATURES

- Higher viscosity for reduced sling
- Excellent coverage
- Non-flammable
- Highly concentrated for minimal usage

### SIZES AVAILABLE

5-gallon pails Code: 20-00053-005
