

Autobooks works hard to make small business banking simple. Through our partnerships with banks and credit unions, small business owners have access to a modern suite that makes business banking easier.

When you join Autobooks, you're joining a team dedicated to small business growth. We want your ideas, passion and experience to continue improving what we offer.

Our downtown Detroit HQ is in the vibrant Madison building, named one of the World's Coolest Offices by Inc. Magazine. Autobooks also has a growing presence in Texas with a satellite office in Austin; and offers flexible, remote work environments for certain roles.

Ready to help change what it means to do small business? Let's talk.

### **The Role: *Junior Developer with a Backend Focus (.Net & SQL)***

*Within this role at Autobooks you will be a junior participant assisting senior staff in the design and development of highly-scalable web applications that run non-stop around the world. You will utilize the latest development tools/technologies and follow agile processes/practices to deliver solutions to Financial Institutions, their small businesses, and those small businesses customers.*

*A successful candidate for this role will have good leadership and excellent communication skills. The candidate will also have strong analytical skills, have prior exposure to design and development, and possess a strong desire to tackle problems with creative solutions. If you love to solve problems and thrive on being challenged, we want to talk to you!*

### **Responsibilities:**

- Assist in designing, coding, and supporting leading-edge financial management web and mobile applications
- Assist in designing, developing, and enhancing large transaction and reporting based DBs
- Designing and implementing improvements to the performance, usability, scalability, and maintainability of our software products
- Assist in determining future technical architecture
- Communicating effectively with team members, customers, and audiences of all technical levels
- Integrating our solutions with partner systems using a variety of protocols
- Continuous improvement to processes and practices with new ideas, concepts, methods and technologies
- Handling periodic on-call duty and out-of-band requests

**Required Experience/Skills:**

- BS/MS Computer Science or related field, and/or relevant work experience
- Exposure to Agile values and principles
- Ability to work in a highly collaborative style with team members, stakeholders, and customers
- 1+ years demonstrated experience with C#, .NET framework, and object oriented design/development. 1+ years of demonstrated experience with relational database design and implementation using MS SQL Server
- 1+ years of demonstrated experience with ASP.NET and related technologies
- Experience in developing multi-tier enterprise class web applications
- 1+ years of experience in development of automated unit, component, and integration testing
- Demonstrated experience with Visual Studio
- 1+ years demonstrated experience in SOA and web service development
- Demonstrated experience with git and/or Visual Studio Team Systems with git
- Demonstrated experience with automated builds, and use of Agile or Scrum process template.
- Exposure to design patterns
- Exposure to LINQ is a bonus
- Experience with MVC, MVP, Entity framework, and NHibernate/ORMs are a bonus
- Experience in developing mobile applications is a bonus
- Exposure to Microsoft Azure cloud services is a bonus

**Job Type:**

- Full Time

**Job Location:**

- Detroit, MI

A flexible, entrepreneurial work environment and team atmosphere makes this a great place to work.
