

SAFETY ALERT

New Hand Sanitizers and Wipes Coming on System.

Due to supply constraints, products not previously seen at our work locations will start being utilized. This is especially true for hand sanitizers and some cleaning wipes. Exelon Industrial Services has begun to produce hand sanitizer for the company and Exelon has partnered with some local distilleries to produce it as well. Some of these products you will be seeing are typically used in the health care field such as *Steris Coverage Plus Germicidal Surface Wipes*.

General Reminders/precautions for those that have sensitive skin:

1. Please rinse or wash your hands after cleaning with wipes.
2. Some hand sanitizers have a high alcohol content and may dry your hands with heavy use. Consider applying lotion to minimize dryness.
3. Some especially sensitive individuals may want to request nitrile or vinyl gloves for prolonged use. These are also in limited supply, but to request them please contact your supervisor.

As always, if concerned please feel free to discuss with your supervisor and/or your Safety Professional.
