

EVANS PERSONAL PARTITION SYSTEM

Operator health and safety has never been more top of mind than it is right now. Critical infrastructure operations need to proceed uninterrupted, unfortunately social distancing can be challenging in an environment that must stay operational during times of crisis.

Personal Space

In an effort to promote social distancing and create a barrier for operators, EVANS has developed the Personal Partition System. This series of side and back panels are designed to create a barrier for the operator, offering protection from airborne threats released during sneezing and coughing. EVANS will work with you to determine the optimal configuration based on your room layout, consoles and operator's needs.

Personal Partition System at a Glance

- Edge-mounted side and rear acrylic partitions
- Industrial grade, scratch resistant panels built to EVANS demanding engineering standards
- Ideal for protecting operators from airborne particles released during sneezing and coughing
- Great way to visually reinforce social distancing
- Easy to install clamps securely affix the partition to your worksurface or slat wall backing
- Engineered to be a long term solution, used as required. When not in use, they can be stored in their reusable crates (included)
- System will be tailored to your control room and unique console configurations to optimize operator comfort and performance
