YOUR INVESTMENT IN
YOUR CONTROL ROOM –
SHOULDN'T YOU?*

Benefits of EvansCare

- Improved health benefits
- Improved equipment efficiency
- Increased return on investment
- Service for ALL brands of consoles, new or old
- CJS Certified: Security cleared cleaning teams to work in sensitive government areas
- Preventative maintenance that reduce overall costs and increase the life of your consoles
- Cable management that offers many advantages to the longevity and performance of your technology and consoles

EvansCare preventative maintenance + console cleaning service is designed for control rooms and other mission-critical environments.

PREVENTION IS PROTECTION

The need for uninterrupted use of equipment is paramount to your operation. Improper console cleaning, insufficient preventative maintenance, and poor cable management can lead to a decrease in productivity for both the technology and its operators, creating lost time; increasing your operating costs.

WHAT PROFESSIONAL CLEANERS DO NOT DO

EvansCare takes a deeper approach. We provide an extensive cleaning service to remove dirt, grime, dust and debris from cavities, wires, cables, electrical equipment, AV systems, accessories, and other console equipment. Our dedicated teams understand the intricate processes required for cleaning and maintaining control rooms. Our preventative maintenance services include:

Console
cleaning

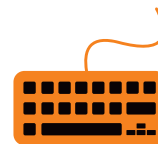

Hinge repairs

Cable
organization

Door leveling

Keyboard
disinfectng

General repair

WHY IT'S IMPORTANT:

- Improves indoor air quality (IAQ)
- Avoid premature console replacement
- Preventative maintenance creates significant value for the life of your console
- Proper cleaning and cable management allows for proper airflow in and around your equipment

Our specialty trained teams are all CJIS (Criminal Justice Information Services) certified and come with some of the top clearances for some of the most secure facilities.
