

It's Time!
WIRELESS
SYNCHRONIZED
CLOCK
SYSTEMS
MADE SIMPLE

With Satellite Accuracy.

TimeTrax Sync . . . It's so **simple** you'll save about half your time.

How? Our Wireless TimeTrax Sync Clock system automatically maintains accurate synchronized time throughout your building or campus using GPS satellite technology. Say goodbye to ladders and index fingers twirling the hands to adjust each individual clock. Your facilities management team and your bottom line will be in sync better than ever.

I bet you are wondering about spring ahead and fall behind right? The satellite signal will automatically adjust for Daylight Savings Time and power outages without missing a tick so you don't have to.

What's this mean for your organization?

Facilities Management Staff will no longer spend valuable time maintaining clocks, freeing them up for more time-pressing matters.

Risk Management Staff will benefit from accurate time records in hospital and healthcare settings, which significantly reduce the chance of critical care errors and subsequent legal action.

School Administrators & Faculty will benefit from accurate and on time commencing and dismissing of classes, resulting in optimum teaching opportunities and less chaos in corridors between classes.

As For You . . .
Personally, you'll get stress-free, low maintenance wireless clock synchronization . . . oh yeah, and peace of mind, too.

TimeTrax Sync . . . A totally integrated solution from one manufacturer.

Wireless Synchronization – It's simple with Pyramid.

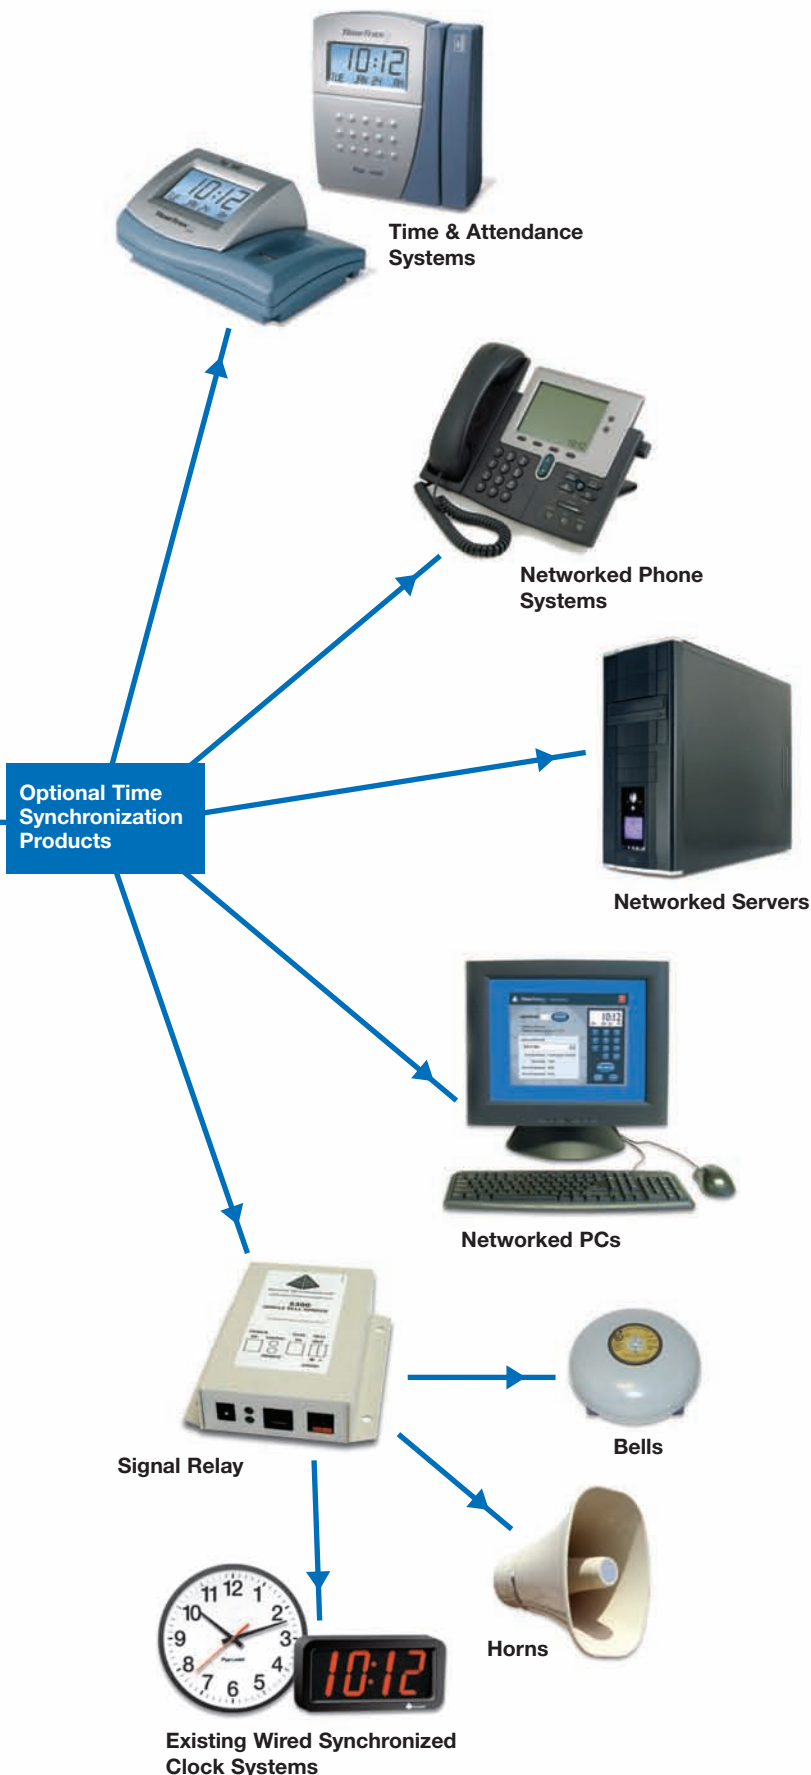

TimeTraxsync

No matter where we are or what we do, time is constant. Take a look around you. The wall clock in your office, your PC, your phone, your fax machine. They probably are displaying different times. Even discrepancies of a few seconds can lead to organization-wide inaccuracies. And, time wasted means lost productivity.

Pyramid has been a trusted name in the timing business since 1969. All Pyramid products meet high-quality industry standards and have undergone meticulous field-testing. Now, Pyramid offers a totally integrated and synchronized wireless solution that can be up and running at your facility in just a few hours.

TimeTrax Sync from Pyramid lets you capture exact time. Time source is captured from GPS satellite signals or via the Internet in NTP (Network Time Protocol) format. Adding an optional network hub connects the transmitter to your servers, desktop computers, time and attendance systems, phones, your existing Simplex clock system, and other components across your organization. With the proper hardware, Pyramid's wireless TimeTrax Sync can tie into virtually any existing synchronized clock system.

YES . . . with the latest innovations from Pyramid, it's that simple and affordable to implement a complete wireless synchronized solution throughout your facility.

The right technology for the right application.

TimeTrax*sync*

The proven industry standard **915MHz** radio frequency will deliver a dependable wireless synchronized clock signal in any vertical application. It is ideally suited for standalone commercial/industrial buildings or a K-12 school system. The properties of the signal allow it to spread out evenly, vertically or horizontally, from a central location ensuring uniform coverage.

- No License Required
- Low Cost Solution
- Self Installation
- Excellent Local RF Penetration Qualities

In today's world, every second counts.

Healthcare

Nowhere is accurate time more crucial than in a healthcare facility where life-saving decisions are made every second of every day. If clocks and computers in the hospital are not synchronized, it can lead to mistakes on charts, discrepancies on patient records, and medication or treatment administered at the wrong time, which can create costly legal issues. Now, with TimeTrax Sync, your facility can:

- Reduce the risk of malpractice accusations
- Synchronize patient appointments, staff meetings, and consultations
- Guarantee accuracy in time-sensitive tasks like administering medication and surgical scheduling
- Reduce maintenance costs

School (K-12)

Being on time is a life skill important to each student's future. Parents have the responsibility to teach the importance of this skill while schools have the responsibility to protect the instructional time it provides. Tardiness of individual students interrupts instructional time. Inaccurate clocks give students a convenient excuse for being late. A new TimeTrax Sync system will help your school:

- Utilize class time more efficiently
- Eliminate time-related obstacles and focus on academic achievements
- Alleviate confusion by synchronizing clocks and bells throughout the school
- Reduce custodial costs

Helping industries stay on time, every time.

University

Keeping thousands of students and hundreds of faculty members on schedule can be a daunting task for today's universities. Schedules are tight with classes, exams, meetings, extracurricular activities and athletic programs crammed into one day. You have enough to deal with without having to worry about whether or not the clock system on your campus is able to handle a growing number of students and increased courses while keeping time accurately. Pyramid's TimeTrax Sync lets you:

- Utilize class time more efficiently and minimize disruptions, leading to more productive learning
- Eliminate the need to reset clocks
- Decrease the maintenance cost associated with a wired system
- Reduce disruptive classroom intrusions

Government

Outdated processes and budget cuts are constant issues in the Government sector. Doing more with less is commonplace. Government employees are under constant scrutiny, and lost minutes are lost taxpayer dollars. The U.S. government provides an accurate time source for the entire world through its GPS system. Pyramid has the wireless solution to carry it throughout your facility, so you can:

- Stay under budget, cutting costs through improved efficiency
- Synchronize wall clocks with computer clocks
- Easily coordinate activities across large facilities and multiple buildings
- Reduce union grievances due to timing issues

Rely on Pyramid for a complete solution.

Industrial

Accuracy and precision are words associated with state-of-the-art industrial manufacturing facilities. But if your facility's time keeping is sub-par, you're risking the quality of the products and services you produce. Filling large orders in a short period of time and keeping costs down are areas of primary concern for manufacturing engineers and operations managers across the country. With a synchronized wireless solution, your facility can:

- Achieve your profitability goals through increased productivity
- Standardize employee arrival and departure times
- Manage workflow more accurately and get shipments out on time
- Get the most productivity on a daily basis

Corporate

Today's businesses in all industries across the board have transitioned from paper-based systems to electronic ones. As a result, the importance of time synchronization has grown significantly. With more and more transactions conducted over networks, the Internet, and email, the speed of business is now determined in milliseconds. If your clocks are not synchronized, data loss is inevitable, critical operations will breakdown, and you will experience severe challenges. TimeTrax Sync lets your company:

- Improve employee time management skills
- Stick to your schedule, holding meetings on time
- Reduce the cost of maintaining a wired system
- Sync with Pyramid's Time and Attendance payroll systems

So . . .
what will you do
with the other half
of your time?

- ☒ Synchronize Clocks
- ☐ Change Light Bulbs
- ☐ Fix the Plumbing
- ☐ Do Paperwork
- ☐ Check Electrical
- ☐ Meet with Boss
- ☐ Training Session
- ☐ Organize Files
- ☐ Return Phone Calls
- ☐ Read the Trades
- ☐ Attend a Seminar
- ☐ Enjoy a Vacation Day
- ☐ Take a Break
- ☐ Smile

TimeTrax Sync Clock Systems –
When Every Second Counts.

Place your time in trusted hands.

- **Established expert in the time keeping industry since 1969**
- **Durable, high-quality, streamlined products**
- **Wireless systems work with your existing network**
- **Simple, software-based installation**
- **Rigorous field-testing by highly skilled engineers**
- **Wireless solutions engineered for 915MHz frequencies**
- **Systems that integrate with Simplex clocks for easy upgrade from wired systems**
- **Integrated time management solutions syncing time and attendance and wireless system clocks**
- **Made in the USA**

5-Year Warranty

Pyramid warrants its wireless time keeping solutions to the original user against defective material or workmanship for a period of 5 years from the date of purchase. If Customer Support cannot troubleshoot your problem over the phone, we will replace your unit free of charge. Extended service/support and warranties are available. Please contact Customer Support at 800.336.3592 for details.
