

## Parks on the Go

### HABITATS

All living things are suited for a habitat, the place that they call home. That is why polar bears live in cold places and not in the desert. Learn more about the polar bears in their habitat, and why different environments are suited better for different living things!

#### Food Chain Challenge

Food chains are a part of habitats that are essential for the ecosystem to survive. Explore the woodland habitat by trying to create food chains and learning about what different animals consume.

#### Woodland Habitat Shoebox Craft

Build a miniature habitat in your home with this craft activity using an old shoebox! Talk a walk outside to get some inspiration on what materials you can use to represent the woodland habitats you see in your neighborhood. Make sure to still practice social distancing when entering public spaces.
