

UiPath Developers' Conference

UiPath 2018 New Product Release Tour

Tejus Venkatesh

What we have in store for 2018

2017.1

Oct 2017

Large Scale Platform

Designed to scale in a resilient configuration & fastest to deploy and run process automations

2018.1

Q1 2018

Enterprise Growth Platform

Super scalable, highly secure and tightly integrated with Cognitive Services

Capability

- Enhanced OCR
- Japanese/OCR Kanji Support
- ABBYY FlexiCapture Integration
- Predefined RPA Dashboards (Kibana)

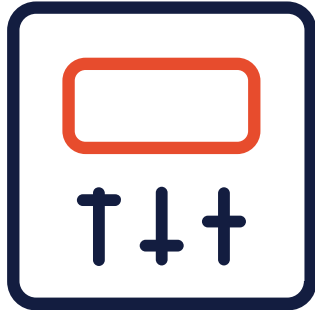

Agility

- [Robotic Service Orchestration](#) Integration (Enate)
- [UiPath Academy](#) in French
- [Flexible Licenseing Support](#)
- [BPM/Case Mgt. Integrations](#) (Oracle PCS, Newgen iBPS)
- [Best-Practice RPA Run-Framework](#) for large scale

Scalability

- [>10000 Robot Configuration](#)
- [Extended Auditing Features](#)
- [Oracle UiPath Edition](#)
- [ElasticSearch Shield Support](#)
- [Hardened RPA Security Features](#)
- [Human-to-Robot Work queue Orchestration](#)

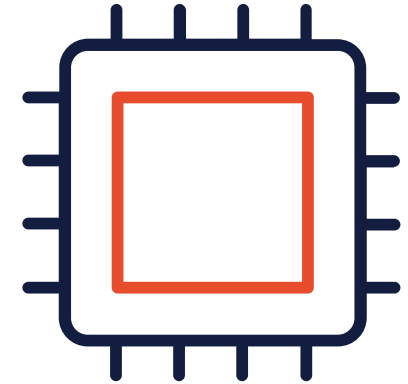

Quick Walkthrough of our Product Suite

UiPath Studio

UiPath Orchestrator

UiPath Robot

What is new in Studio

Robotic Enterprise Framework

New

Blank

An empty project. A diagram is a graphical representation of a business process.

Simple Process

Model a process as a flowchart diagram.

Agent Process Improvement

Trigger an automation in response to a mouse or keyboard user event.

Robotic Enterprise Framework

Create a transactional process that follows best practices for large-scale deployments.

- Structured and Modular
- Maintainable and Upgradable
- Easy Error Isolation

What is new in Studio

OCR Kanji

Japanese Enablement

- Support OCR Kanji and Japanese
- Intelligent Screen Object Recognition
- Improves accuracy of computer vision

What is new in Studio

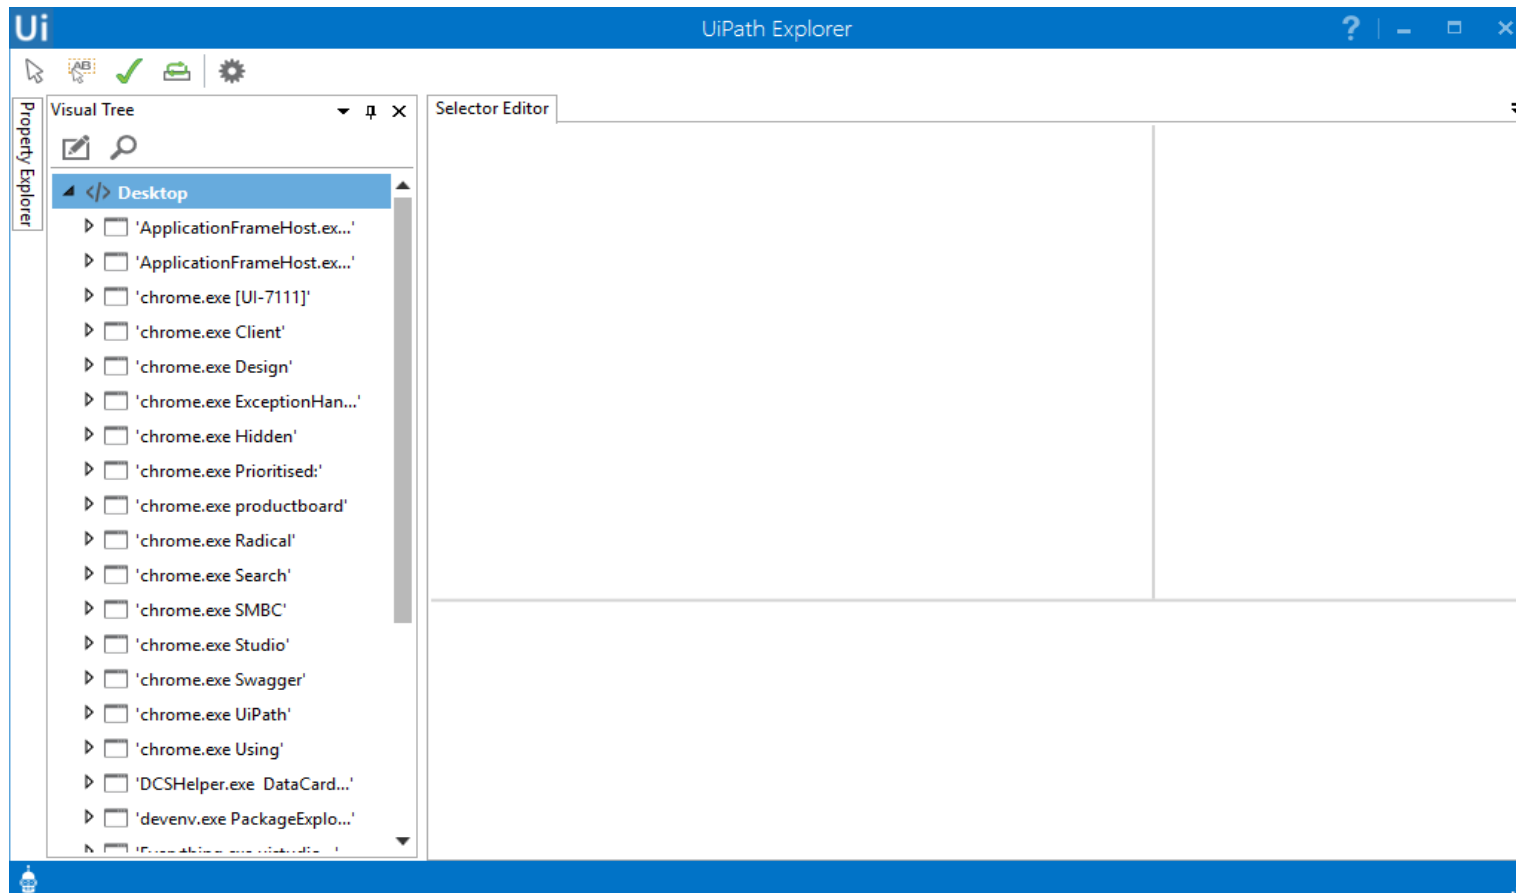

Improved OCR With Tesseract 4.0

- Improve OCR Capability
- Improved Robot's Computer Vision of images and PDF
- Existing OCR accuracy increased by 20%

What is new in Studio

UI Explorer & Selector Editor Consolidation

- Automatic validation of Screen Object Identifiers – Selectors
- UI Redesign – Combine UiExplorer with Studio
- Auto-complete of Variables and methods for Dynamic Variables

What is new in Studio

Orchestrator Activities Pack

- SetCredential
- SetAsset
- StartJob
- GetJobs
- StopJob
- GetQueueItems
- DeleteQueueItems
- RaiseAlert

What is new in Robots

Centralized Robot Settings

- Allows to control settings of each Robot from Orchestrator
- Change Execution settings for a Process or a Job
- Log Level, Resolution and Console mode

What is new in Robots

Restricted Read Access XAML Automation Files

- Deployment Best Practice
- Non Editable at Robot Level
- Adding secure RPA Codes

What is new in Robots

Improved Logging capabilities

- Additional fields implemented to Robot Log
- Improves Orchestrator Reporting on Process / transaction execution
- Allows better support for Visual Analytics

What is new in Orchestrator

Queues Reporting

Queues - Review & Audit

- Ability to comment
- Ability to assign a user to a queue item for review
- Ability to view the item history

What is new in Orchestrator

Full Audit On Orchestrator Actions

- Enriched audit with more details
- Data view filters for all actions
- Host Audit – Tenants created, enabled or disabled

What is new in Orchestrator

Elasticsearch Shield Integration

- Prevent unauthorised people to access analytical data and logs

What is new in Orchestrator

Security Enhancements & Password Policy

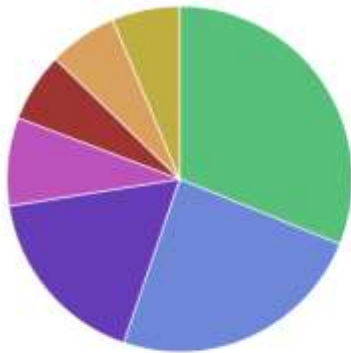

- Stronger password management and access to the Orchestrator
- Configurable higher rigor for access passwords
- Prevents user ids being used on multiple systems environments or workplaces

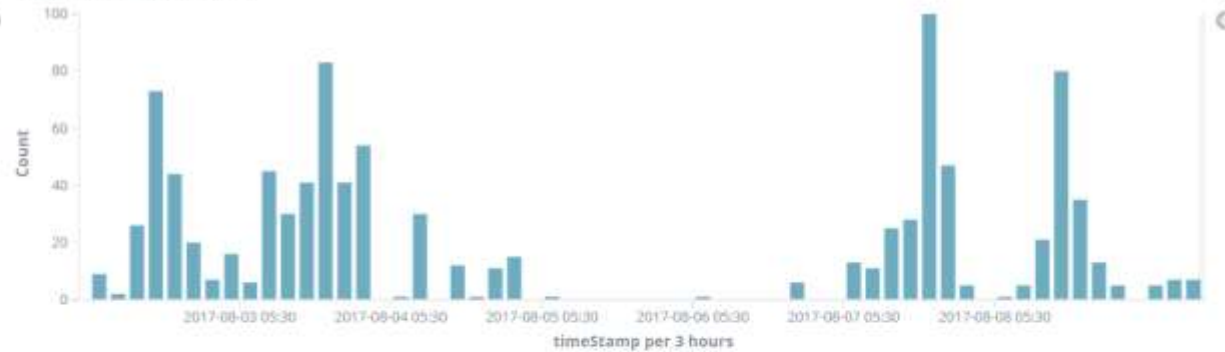

What is new in Orchestrator

Predefined RPA Dashboards

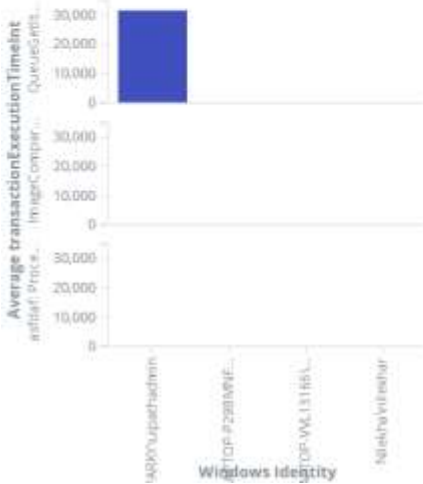

Top 7 robots

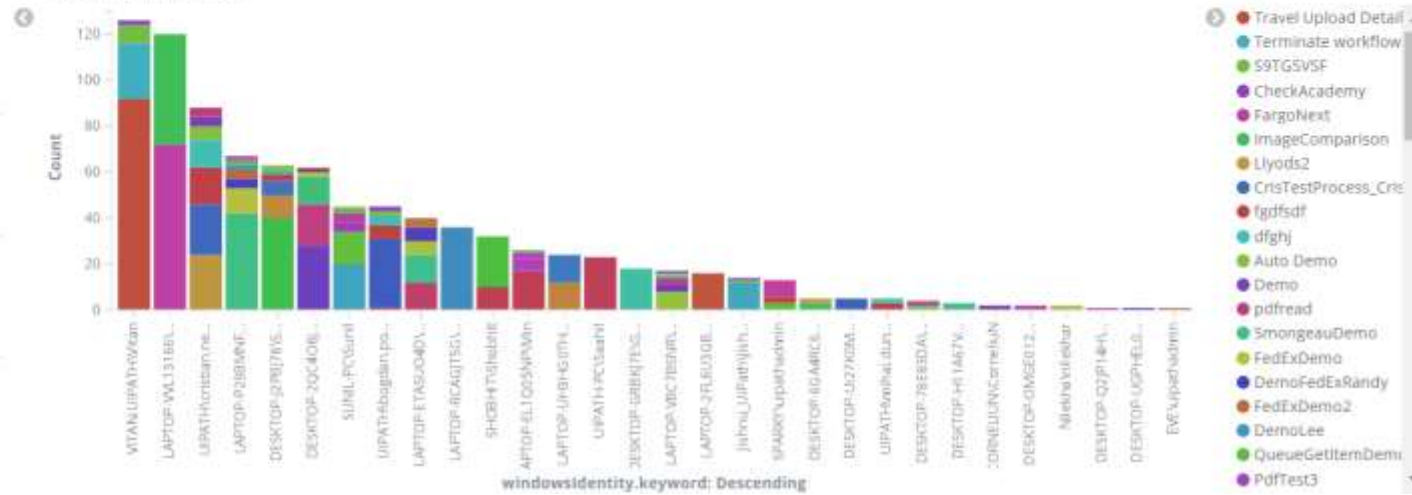

Ended Processes this week

Average Execution time per Windows Identity

Ended jobs per Robot

What is new in Integration

Celonis (co-exist setup)

Oracle PCS integration

Newgensoft iBPS Integration

K2 integration

Enate Integration

celonis
