

MENU OF SERVICES

Our Philosophy

Your ultimate treatment experience at Rocky Mountain Laser Aesthetics begins with a complimentary consultation performed by one of our medically trained Aestheticians. Before any procedure is administered, we review your aesthetic concerns and goals and then develop a customized treatment plan to address your specific needs and interests.

ADVANCED LASER TREATMENTS

- ❑ **Laser Hair Removal** – Remove unwanted hair with advanced laser technology designed specifically for your skin type. We offer the option of several types of lasers to ensure the best results for your needs.
- ❑ **Laser Vein Removal** – Reduce the appearance of facial and leg spider veins and other irregularities of the skin.
- ❑ **Diolite 532 nm Laser** – High tech focused beam laser which effectively removes unwanted sunspots, age spots & superficial blood vessels to the face at an affordable price.

MICRODERMABRASION BASED TREATMENTS

- ❑ **Microdermabrasion** – A skin exfoliating technique that helps with fine lines, wrinkles, stimulates collagen, reduces hyperpigmentation, removes dead skin cells, smooths texture, and reduces scars, pores, and acne. We offer the DiamondTome crystal-free skin resurfacing system to address the different skin conditions and imperfections.
- ❑ **Chemabrasion** – Enhance the effectiveness of a chemical peel by performing an exfoliating microdermabrasion prior to a glycolic or TCA peel to help free pores of debris. Improve skin color, fine wrinkling, texture and tone to a greater extent than a chemical peel alone.
- ❑ **Dermaplaning** – A simple and safe procedure for exfoliating the epidermis and ridding the skin of fine vellus hair. It results in a more refined, smooth appearance.

LASER SKIN REJUVENATION

- ❑ **Microlaser Peel** – The Sciton MicroLaserPeel is ideal for patients with little downtime to spare. This peel removes fine lines and wrinkles, leaving fresh and youthful skin in its wake. This precision Sciton laser head reduces any discomfort for perfect coverage and uniform ablation.
- ❑ **Sciton Profractional Peel** – This quick and comfortable laser procedure is used to improve the overall appearance of your skin using a laser microbeam to treat thousands of pinpoint areas of your skin. It provides a dramatic improvement in wrinkles, scars, tone and texture with little to no downtime.
- ❑ **BBL/IPL Fotofacial** – Erase age spots and pigment imperfections with this gentle treatment of light pulses to target specific flaws including age spots, freckles, sun damage, redness and enlarged pores as well as fine lines and wrinkles.
- ❑ **The Ultimate Laser Peel** – Combines the advantages of the above three laser peels (Microlaser peel, Profractional laser peel, and IPL fotofacial) in one office session. See a wonderful improvement with fine wrinkling, sunspots, agespots as well as skin tone and texture.

ACNE TREATMENTS

- ❑ **Blu-U Photodynamic Therapy** – Eradicate acne-causing bacteria at the cellular level. BLU-U is the latest advancement in light based technology used to treat light to moderate recurrent acne without medication. Ideal for patients of any age.

CHEMICAL PEELS

- ❑ **Glycolic** – A glycolic peel has excellent exfoliating properties that makes it an ideal treatment for fading sunspots, acne scars, blemishes, fine lines & wrinkles.
- ❑ **TCA** (trichloroacetic acid 10-25%) – a unique peel that can be adjusted from an effective exfoliating peel up to a deeper, more aggressive treatment used to correct more serious skin concerns.
- ❑ **Mini-Melanage Peel** – A liquid mask is applied in the office and taken off at home after 6-7 hours. Used to treat deep melasma and brown spots.

MICRONEEDLING

- ❑ **Microneedling Therapy** increases the volume and elasticity of your skin, giving you younger-looking, smoother, more resilient skin. Microneedling creates micro-perforations in the epidermis. This helps to reduce fine lines and wrinkles, lifts and tightens skins, minimizes pore size and improves the appearance of scarring. It is safe for all skin types.
- ❑ **PRP (Plasma Rich Platelets)** – Blood is obtained from the patient which is then spun in a centrifuge to separate the plasma rich platelets. The PRP is applied topically to the face immediately prior to and after treatment with the microneedling pen.

FACIALS

- ❑ **HydraFacial MD** – It's a unique 3-step process that cleanses, moisturizes, and nourishes facial skin. HydraFacial MD offers broad benefits when it comes to rejuvenating or improving your skin, making it a great choice whether you're looking for a soothing yet invigorating facial experience or to address specific skin concerns.

We are pleased to introduce the *Raval Club Memberships* See back for details.

- Raval Mattifying Face Lotion

The Raval Essential Night Cream and Raval Lightening C Serum are made to order when purchased so you can be assured that your product is fresh!

IN OFFICE PROCEDURES

In office procedures are offered through Raval Facial Aesthetics –

- Botox & Dysport** – Prevent the formation of facial wrinkles and creases. Botulinum toxin A injections can soften the look of existing crows feet, furrows in the brow and soften the lines of the forehead. Also can be used to decrease excessive sweating on the palms and underarms. Results may vary. Typical results last 3-4 months.
- Dermal Fillers** – Add volume to moderate to severe facial wrinkles and decrease the depth of fine lines. Results may vary. Filler results may last at least 12-24 months depending on the type of dermal filler.
- Restylane** **Juvederm**
- Vollure** **Voluma**
- Volbella**

Kybella – To reduce submental fat, Kybella is injected under the chin. The injected formula contains naturally-occurring deoxycholic acid that helps you dissolve and absorb fat cells. For moderate to severe double chins, multiple injections of the Kybella formula have been shown effective for thousands of patients in over 20 clinical trials."

PFRM (PLATELET RICH FIBRIN MATRIX)

PRFM stimulates new cell growth in the patient's body wherever it is injected. It helps the body heal itself the natural way. The possibility of an allergic reaction or infection is almost nil because the plasma comes from the patient's own body. PRFM treatments are being utilized to treat the following:

- Hair Loss** **Acne Scarring**
- Facial Volumization**

FACIAL PLASTIC SURGERY
