

Animal Subjects Research Simplified

Increase efficiency, reduce exposure, and manage risk

Cayuse IACUC is an easy-to-use system for electronically preparing, submitting, and routing studies for IACUC approval.

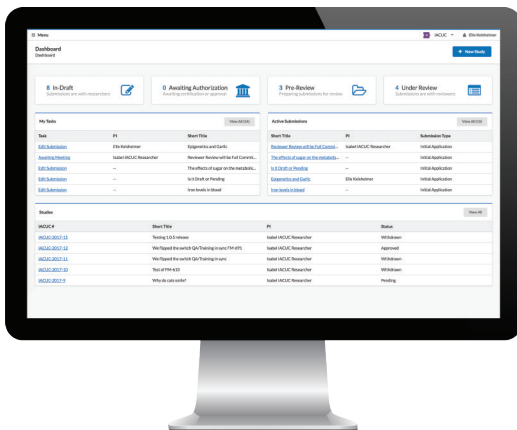

All information is stored in the cloud and can be accessed securely from any location—making it simple for multiple, simultaneous users to view and share documents.

- Reduce protocol review times and increase collaboration
- Reduce paper and printing costs by 100%
- Easy-to-use and flexible system that allows you to be up and running in weeks—not months

Cayuse IACUC is designed by research administrators with 20+ years of experience. Since implementing Cayuse IACUC, customers have been able to:

- Reduce Administrative Burden
- Improve productivity and reduce errors
- Increase Transparency for the entire IACUC office
- Enhanced communication between committees, reviewers and researchers

FEATURE	BENEFIT
Smart Form Interactive Designer	Create complex questionnaires and replace paper forms
Intelligent workflows with branching logic and progressive disclosure	Reduces exposure and increases efficiency
ISO 27001 certification	Only vendor with 27001 certification
Cloud-based Solution	No on premises hardware or architecture required, easier to implement, doesn't require IT to maintain
Automated Protocol Status Updates	Updates key participants of relevant tasks and action items
Built-in Flexibility	Easily customize around your processes and adapt to changes
World Class Support	98% customer satisfaction

Cayuse IACUC provides transparency into all phases of a protocol, enabling broad collaboration and increased efficiency among research administrators, investigators and IACUC members.

Users receive electronic notifications whenever an action is required on their part, allowing the study to proceed smoothly through each step of the process—from study creation to final approval.

By simplifying compliance with federal, state and institutional governing bodies, Cayuse IACUC helps ensure your human subjects research efforts conform to ethical guidelines.
