cayuse IRB

Human Subjects Research Simplified

Increase efficiency, reduce exposure, and manage risk

Cayuse IRB is an easy-to-use system for electronically preparing, submitting, and routing studies for IRB approval.
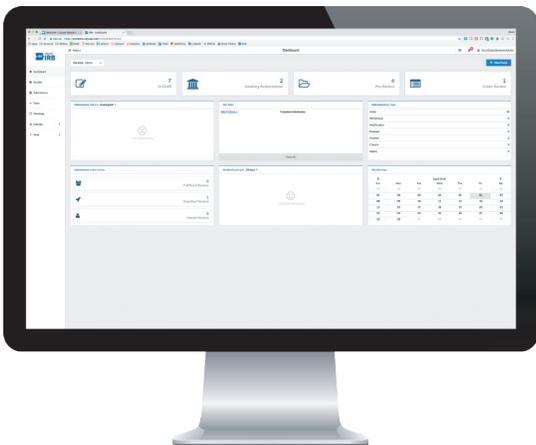

All information is stored in the cloud and can be accessed securely from any location—making it simple for multiple, simultaneous users to view and share documents.

- Reduce turnaround times on exempt research
- Reduce paper and printing costs by 100%
- Easy-to-use and flexible system that allows you to be up and running in weeks—not months
- Integration with CITI©

Cayuse IRB is designed by research administrators with 20 + of experience in the field. Since implementing Cayuse IRB, customers have been able to:

- Reduce administrative burden
- Improve productivity and reduce errors
- Increase transparency for the entire IRB office
- Enhance communication between committees, reviewers, and researchers

FEATURE	BENEFIT
Smart-Form Interactive Designer	Client based configurable templates with progressive logic
Automated Notifications	Reminders of tasks and expiring studies
Role-based Dashboards	Snap Shot of all protocols enhancing transparency
Web-based and protected by ISO 27001 certified information security	Anytime, anywhere access keeps your IRB office running smoothly all the time
Side-by-side comparison	Protocol reviews are easier and faster
Built-in Flexibility	Easily configured around existing processes and adapt to changes
Certified Time Savings	Designed with AAHRPP accredited partners, workflows deliver maximum efficiency and ease-of-use.
Configurable letters, messages & checklist	Create and update templates as needed, without any additional costs

Cayuse IRB provides transparency into all phases of a protocol, enabling broad collaboration and increased efficiency among research administrators, investigators and IRB members.

Users receive electronic notifications whenever an action is required on their part, allowing the study to proceed smoothly through each step of the process—from study creation to final approval.

By simplifying compliance with federal, state and institutional governing bodies, Cayuse IRB helps ensure your human subjects research efforts conform to ethical guidelines.
