GREAT CLOUD SOLUTION FOR THE MID TIERED COMPANY

“

Sage Intacct would fit well with both for-profit and nonprofit entities who need more reporting dimensions than QuickBooks. With the depth of available third-party add-ons, you can time and customize your instance at your pace and financial situations. Sage Intacct lays a very strong financial foundation for any company looking for an application that is reliable and forward-thinking.

TO SAGE OR NOT TO SAGE

Sage Intacct is great for companies that have separate entities and need to have the capability to track the entities separately or the ability to track on a consolidated basis. It is also great for when you have to track projects such as for restricted contributions or by grants. Reporting is easy to run by project which allows for easy reporting for the individual projects.
