

The Slideways Advantage

Slideways is your **CUSTOM MACHINED** plastic components specialist.

We are committed to providing
A Positive Work Environment • The Highest Quality Products
Unparalleled Customer Service

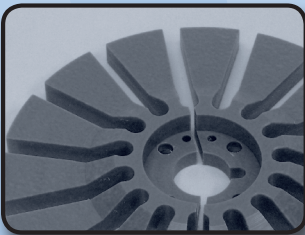

Our efficient manufacturing process saves you money!

We offer the advantage of being able to make small and medium sized runs without the high tooling costs of extrusions or castings.

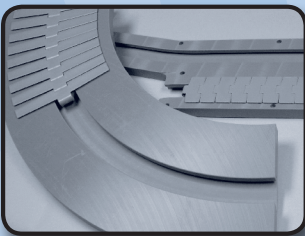

Slideways plastic components are less expensive and perform better than steel and aluminum parts

Slideways sprockets have replaced steel in applications such as packaging machines and wastewater treatment. Plastic components last longer, operate more quietly, and weigh less than metal parts.

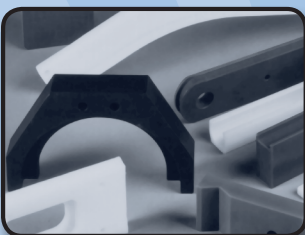

We produce parts from your drawings or reverse engineer them from samples

Whether your design is simple or complex, Slideways can follow your designs to create the parts you need, fast!

Parts are designed and shipped quickly to meet your deadlines

Our standard time from ordering to shipping is two weeks. And Slideways can produce and ship custom trax for table-top chain in as few as two or three days.

Slideways plastic components can handle temperatures ranging from cryogenic to +800 °F

The same Slideways chain guides can be used on both spiral freezer conveyors and high-temperature sterilizers.
