

# Global Network Services

To expand a business globally, consistent communications across multiple sites is critical. That's where our managed Network Services comes in.

At Conn3ct, we integrate networks and cloud services to make it simpler for our customers to manage complex network solutions. We provide innovative, reliant, global voice and data services through our proprietary core network platform, CRISP, inter-connected with global Tier 1 carriers and the public cloud platforms.

“With Conn3ct you get what you need, not what you're given”

James Arnold-Roberts, Managing Director, Conn3ct

# What You Need Not What You're Given

We integrate networks and cloud services specifically for voice, collaboration and unified communications worldwide, giving our partners simpler management of complex network solutions.

We have deployed, connected and managed business communications for twenty years. With this expertise, we give you bespoke, flexible, best-fit solutions to complex requirements, when the big network carriers can provide only one-size-fits-all.

**That's why, with Conn3ct, you get what you need, not what you're given.**

## Global Network Infrastructure

Our Connectivity Solutions are supported by our own core network, built for voice services and delivered by more than forty Tier 1 global carriers. The fully resilient network employs a 'node' infrastructure offering local delivery and access of services across the world. Services include:

- Ethernet connectivity
- SD WAN
- Co-location
- Direct Internet access
- International SIP (iSIP)
- Virtual hosting
- Cloud Connect

 12 Global Nodes and 700+ PoP's	 250 + Network Interconnects	 Hybrid Hosting
 Global iSIP Platform		 Global Internet
 40+ Carriers	 Direct connectivity to Cloud Platforms	 Full SDN Support

## The CRiSP Advantage

Our proprietary CRiSP routing platform enables the integration of networks to give you best-fit, best-cost, bespoke solutions with the flexibility and agility to optimise network design for changing requirements. CRiSP employs global MPLS to provide fully managed QoS and a single service level across multi-carrier solutions.

These include access to:

- Internet gateways
- Cloud platforms
- Hosted voice solutions
- Managed firewalls
- Global SIP
- Global ethernet
- Global MPLS
- SDN WAN

## About Conn3ct

Conn3ct is a truly vendor-agnostic communications partner that helps multi-site organisations across the world solve their communications challenges.

Conn3ct are a trusted advisor that draws on over 30 years of knowledge and experience to solve complex communications challenges in three areas; **Contact Centres**, **Unified Communications (UC)** and **Network Services**.

Our vendor-agnostic capability allows us to build completely bespoke solutions for your business. We deliver end-to-end digital transformation by refining your people, processes, and technology.

## Our Clients

We support a diverse range of blue-chip organisations across the globe in the deployment and management of Unified Communications, Contact Centre and Network Services environments.

## Carrier Partners

Conn3ct enjoys long-standing relationships with the world's leading technology partners. We have the highest level of accreditations to provide on-demand experience and expertise.
