## INTRODUCING SAGE X3 UPDATE 10 (CLOUD)

Sage has announced the launch of Update 10 for Sage X3 Cloud customers. This newest update includes a collection of new features with an emphasis on addressing a few functional gaps in the areas of Finance, Distribution, and Manufacturing. Here's a look at the most important changes.

### Finance, Distribution, and Manufacturing Enhancements

Here's a quick summary of the improvements in Finance, Distribution, and Manufacturing:

**Financial Management** - budgets are now more flexible with up to 9 dimensions (up from the previous max of 3), the ability to simulate the result of automated journal entries, enhanced flexibility of reminders, and improved management of payments and discounts.

**Sage Intelligence Reporting** - integration of Sage Intelligence Reporting into Sage X3 Cloud (as the core financial reporting solution) marks the first step in preparing for the future replacement of the current financial data extraction tool.

**Distribution** - updates to the distribution suite include logistics workflow improvements (shipments and carriers), lot traceability on subcontract orders, new multi-counting in inventory that allows multiple people to count the same product, and a customer service calendar widget in CRM with links that allow you to jump to the original documents with a click.

**Manufacturing** - the previous Update 9 delivered versioning for the product and BOM. Update 10 now incorporates versioning in routings. In addition, shop floor tracking improvements make it even faster and easier to capture accurate labor and production costs.

### Other Improvements

Other notable enhancements in Sage X3 Update 10 include:

**Mobility** - several improvements were made to the mobile interface with the objective of giving more real-time visibility in secure mode and to reduce delays in decision-making. These changes include leveraging native Windows 10 features like sharing, notifications, live tiles, barcode scan, Cortana integration, and more. Mobile improvements also include management of drafts (offline edits and synch), auto-fill templates, memos, and drill down/up on queries.

**Platform Enhancements** - support for multiple application servers (no single point of failure), easy updates, derivate languages, API management, batch controller, Cloud provisioning improvements, and RDS support for MS SQL 2014.

**NOTE:** Sage X3 Update 10 is available for cloud customers only. The next version and update for Sage X3 on-premises customers is currently scheduled for February 2017.

# NEWS YOU CAN USE

## Sage Intelligence Reporting Bundle Now Available at No Cost

Sage Intelligence Reporting is now available as a bundle for all Sage X3 customers. If you're running version 6 or higher, you're eligible to receive a one user bundle at no cost.

### What is the Bundle?

As part of the standard Sage X3 product offering, the Sage Intelligence Reporting Bundle includes:

- One Report Manager user license (workstation-based license)
- One Report Designer module
- One Connector module license

For larger organizations that need more than one license, you can get add more Report Manager or Report Viewer licenses at an additional cost.

### What is Sage Intelligence Reporting?

[Sage X3 Intelligence](#) pulls real-time financial and operational data from your Sage X3 system and then delivers it in Excel templates which you can easily view and/or customize.

The Excel-based interface let's you slice, dice, and analyze your Sage X3 data in graphs and pivot tables that provide a much more hands-on and visual experience than standard reports can provide.

For customers (version 6 or higher) that would like to add Sage Intelligence Reporting, please follow the typical license request process with Sage in order to get the complimentary Sage Intelligence one-user license bundle for Sage X3.

Or [contact us](#) directly and we'll help you get it started.
