* Enterprise Management was formerly known as Sage X3

Important new features and improvements

New in Production Management
Project Management

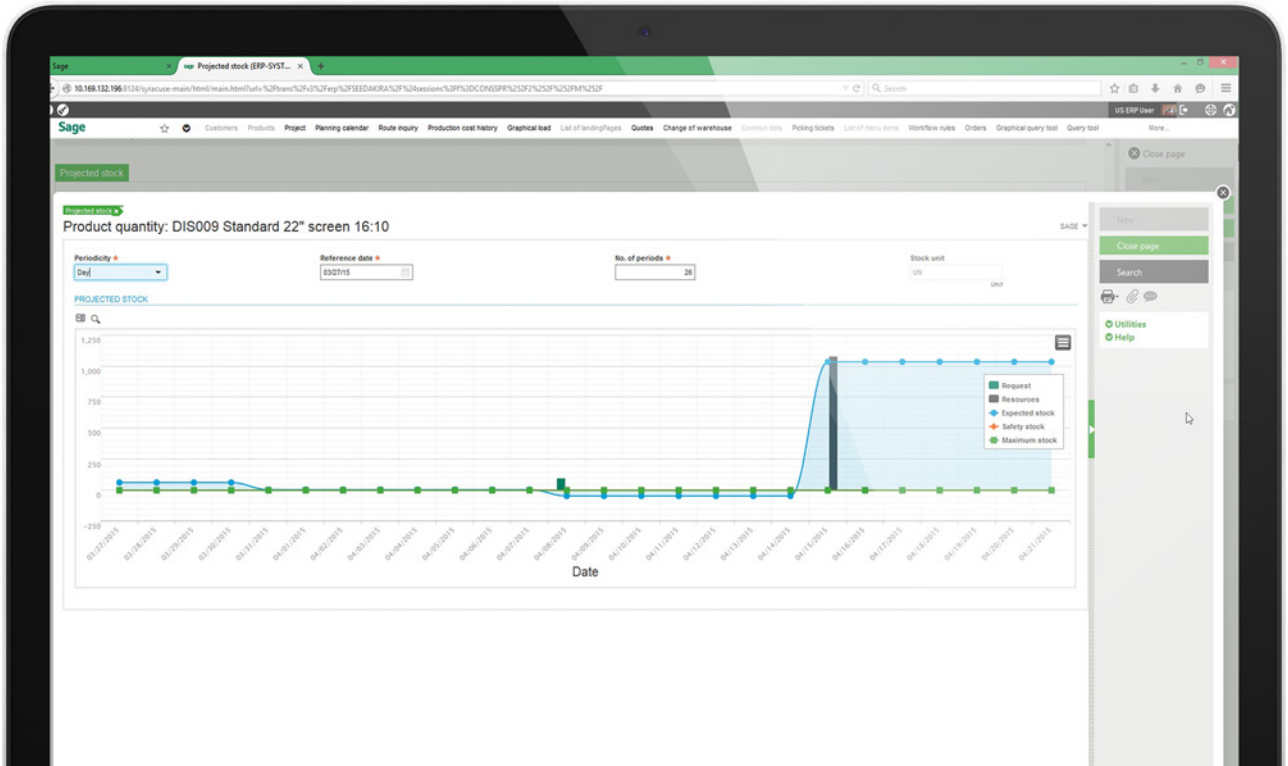
Manage all aspects of a project across financial, distribution and/or manufacturing processes, from quoting to planning resources and material, tracking costs and schedule, invoicing and analyzing profits.

New in Production Management
Production Scheduler

Optimize production cycles and control lead times with more flexible graphical production planning and scheduling capabilities.

New in Production Management
Automated Bank Statements

Improve the efficiency of the financial process by automatically generating the transactions matching open items or unbalanced operations when importing bank statements (MT940).



New integrations

☰ Introduction

1 Important new features and improvements

2 **New integrations**

3 Other functional improvements

4 New complementary solutions

5 Availability

New in Supply Chain Management
E-commerce

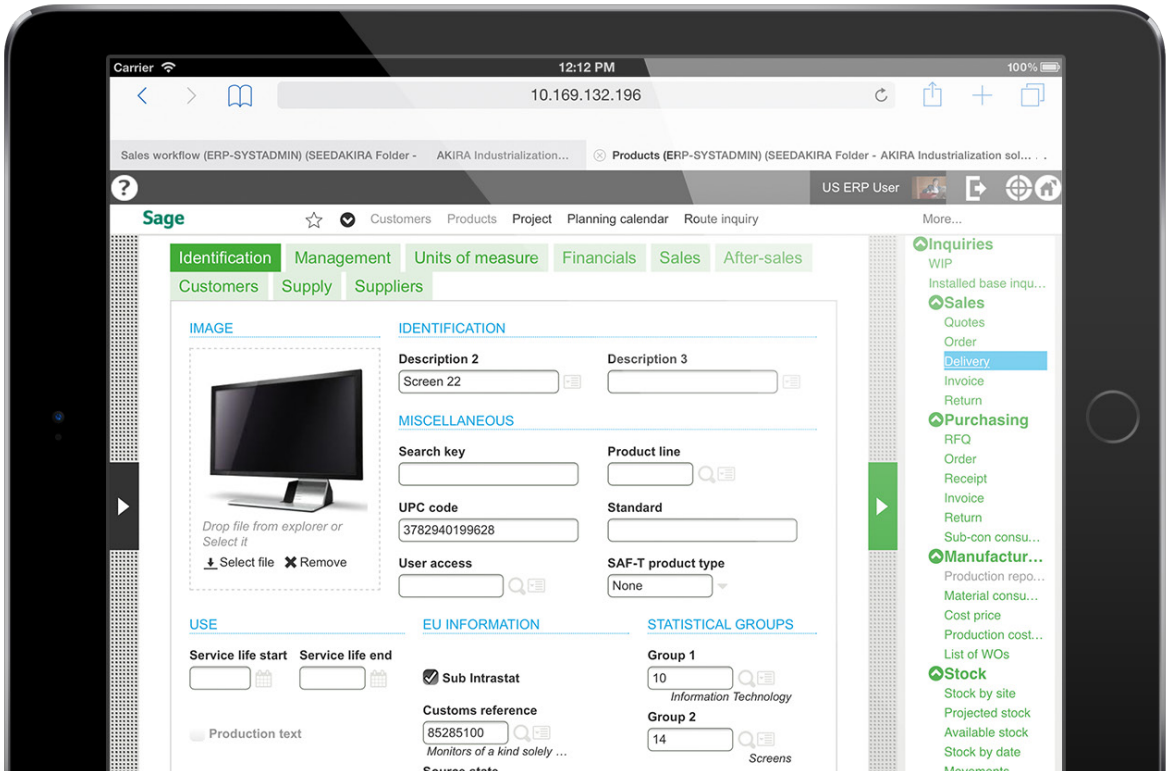
Build or customize a comprehensive webstore within days, and manage catalogs, pricing, inventory, customers, and all transactions as part of the Enterprise Management* core supply chain management processes.

New in Supply Chain Management
CRM

Synchronize customer records between Salesforce CRM and Enterprise Management*, and display customer orders in Salesforce using the new Enterprise Management Connector.

New in Financial Management
Financial Reporting

Easily design reports, with intuitive Excel-based reporting capabilities integrated with Enterprise Management* financial management, and automate the running and distribution of reports to teams or individuals.



* Enterprise Management was formerly known as Sage X3

Other functional improvements

☰ Introduction

1 Important new features and improvements

2 New integrations

3 **Other functional improvements**

4 New complementary solutions

5 Availability

Supply Chain Management

- Optimize container capacity for shipments
- Attach & track documents associated with receiving goods
- Easily customize steps to track during receiving process
- Easily update costs associated with purchasing on shipment and view shipment cost totals
- Create complementary invoice from shipments

Production Management

- Enable shop floor tracking by team, available in ADC

Financial Management

- Accelerate closing with real-time inter-company consolidation process, at the right level of aggregation
- Accelerate currency conversion by running conversions in one run, at the balance sheet level (vs. transaction level)
- Fast entry booking: accelerate journal and AP/AR entries.
- Automate reminder campaigns based on amounts or intervals
- Enable blocking sales transactions based on credit rating
- Compliance updates for AU, DE, PL, PT, ZA, ES, FR, CH
