

MAPADOC for Enterprise Management SWK Technologies

About MAPADOC

Developed in the late 1990's, MAPADOC was created to fill the need for integrated EDI without the time and expense required for custom development. First integrated with Sage 100, MAPADOC became the go to EDI solution when Sage turned over their EDI customers to MAPADOC in 1998. As MAPADOC matured, SWK Technologies developed integrations with Sage 500 and Enterprise Management. **Today, MAPADOC for Enterprise Management is the only Sage certified, fully integrated, embedded EDI solution for Enterprise Management.**

MAPADOC's seamless integration with Enterprise Management provides customers with peace of mind that their EDI needs are being handled from beginning to end. Working with the translator, MAPADOC collects the inbound EDI documents, processes them and brings them into Enterprise Management. On the outbound side, when triggered by activities within Enterprise Management, MAPADOC will process and send the outbound documents to the trading partner.

MAPADOC is configured and sold in four distinct modules, each module containing specific document sets.

- ✓ The Sales Order Processing module includes the inbound Purchase Order (850/875), the outbound Invoice (810/880), the Product Activity Data Report (852) and the PO Acknowledgement (855). The Sales Order module is used by businesses that supply goods to large retailers, big box stores, dot.com vendors and grocery stores.

- ✓ The ASN Module contains the outbound Advance Ship Notice (856). The Advance Ship Notice document is often required by large retailers as it gives them detailed

shipping information.

- ✓ The Purchase Order Processing module includes the inbound Invoice (810) and the outbound Purchase Order (850). The Purchase Order module is used by businesses that purchase goods from suppliers. It is possible that a company would use both the Sales Order module and the Purchase Order module if their raw materials

supplier requires EDI.

- ✓ The Remote Warehouse module includes documents normally exchanged by businesses that utilize outside warehouses or third party logistics (3PL) companies. The warehouse documents include the outbound Warehouse Shipping Order (940) and the inbound Warehouse Shipping Advice (945). These documents serve as an order to a remote warehouse that instructs them to ship orders and as confirmation of shipment. Many enterprise companies use 3PLs and will implement these document sets.

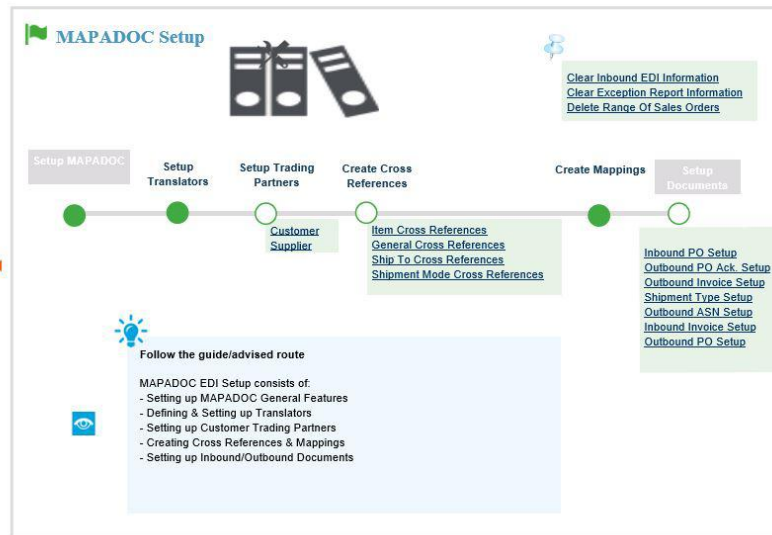

Features

Intuitive and Easy to Use

Built into the Enterprise Management platform using the Enterprise Management code and workflow, MAPADOC is easy to learn and intuitive to use.

MAPADOC DASHBOARD

- MAPADOC
 - Setup
- Inbound
 - Purchase Orders
 - Purchase Invoices
- Outbound
 - PO Acknowledgements
 - ASN
 - Invoices
 - Purchase Orders

Because MAPADOC is built right into the Enterprise Management platform, as documents are processed through MAPADOC, they are imported using the Enterprise Management business logic to ensure postings throughout the product are handled as if they originated in Enterprise Management. Additional validation and translation is performed through the cross-reference tables designed to ensure data is complete and the business terms used are understood by each side of the transaction.

[EDI Sent Register](#)

[Outbound Creation Exception Report](#)
[EDI Ready To Send Register](#)
[EDI Sent Register](#)

Follow the guide/advised route

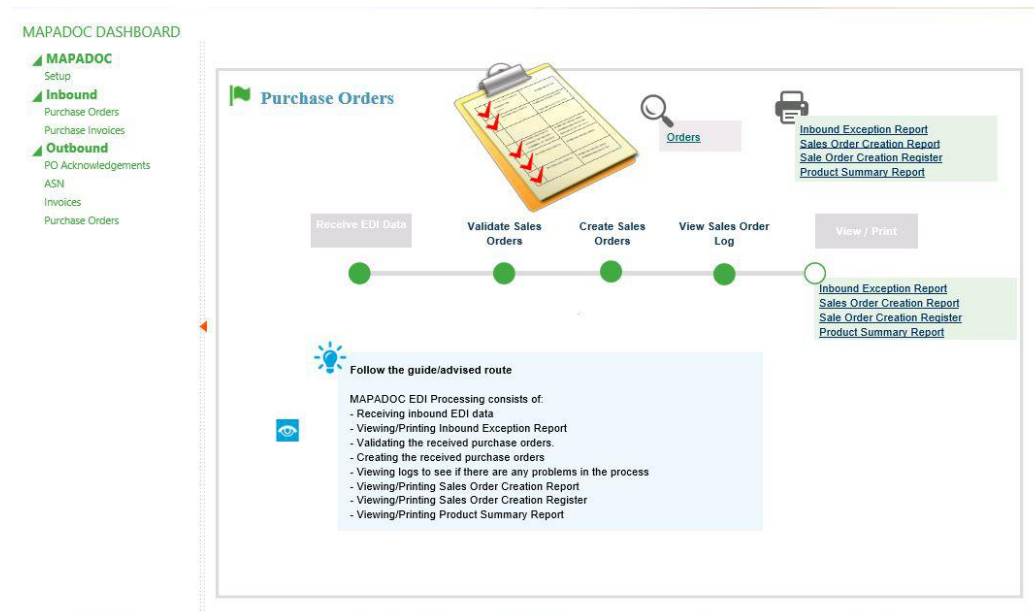

MAPADOC EDI 810 Out consists of:

- Selecting EDI Invoices
- Creating Outbound Documents
- Viewing logs to see if there are any problems in the process
- Viewing/Printing Outbound Creation Exception Report
- Viewing/Printing EDI Ready To Send Register
- Viewing/Printing EDI Sent Register

Flexible and Customizable

MAPADOC provides the flexibility for you to handle EDI the way you want to with the ability to manage mapping or have the MAPADOC team do it for you. In addition, with the ability to work with multiple translators, MAPADOC enables you to choose the translator that fits both your budget and your business needs.

Just like Enterprise Management, MAPADOC is customizable to fit your business processes and workflow. If you want a data field from your EDI to be placed in a specific field in Enterprise Management, it is taken care of with minimal effort. Work the way you want to, not the way a vendor tells you!

Large Selection of Supported Documents

MAPADOC supports the most common EDI document sets:

Inbound	Outbound
Purchase Order (850)	Invoice (810)
Product Activity Data Report (852)	PO Acknowledgement (855)
	Advance Ship Notice (856)
Invoice (810 for vendor side EDI)	Purchase Order (850 for vendor side EDI)

Warehouse Shipping Advice (945)

Warehouse Shipping Order (940)

About SWK Technologies

SWK Technologies is a business application and consulting company providing strategies and solutions to meet our clients' information and business management needs. As a Sage Software Authorized Business Partner, Sage Certified Gold Development Partner, Sage Certified X3 Partner and Sage Authorized Training Center, we offer best-of-breed solutions for accounting and business management, financial reporting, ERP, CRM, job costing, EDI, and warehouse management.
