NEW ADD-ON SOLUTIONS FOR SAGE X3

Extend Your Core ERP System

The release of Sage X3 Version 11 earlier this year introduced a handful of new integrated add-on solutions that extend the core functionality of Sage X3. In this article, we'll look at a couple of these complementary solutions that provide advanced features for warehouse management (WMS), E-commerce, and construction.

Sage X3 Geode

[Sage X3 Geode](#) is a powerful Warehouse Management System (WMS) designed for mid-sized manufacturers, distributors, and 3rd party logistics companies that need more sophisticated warehousing functionality. A step up from the core inventory capabilities in Sage X3, Sage Geode is a configurable, rules-based WMS system with sophisticated algorithms that map your warehouse, optimize space, improve efficiency of employee activities and movement of stock, anticipate fluctuations, and make your entire supply chain faster and more efficient.

Sage X3 E-commerce

[Sage X3 E-commerce](#) provides B2B and B2C wholesale and distribution businesses with a cloud-based shopping cart platform to display and sell products and services. Built from the ground up for Sage X3, Sage E-commerce features a real-time two-way integration that automatically synchronizes data in both systems with no batching, no errors, and never any manual order entry or re-keying. You can manage catalogs, pricing, inventory, customers, and online transactions as an integrated part of your supply chain management process.

Sage X3 Construction

Built specifically for Sage X3, the new [Sage X3 Construction](#) is designed to manage even your most complex construction or real estate projects. Featuring a completely modern interface, this industry-specific solution delivers capabilities for project management, contract and sub-contract management, estimating, timesheet, project financial and cash flow tracking, document management, and more.

And with a mobile-first design, your fields teams will have access to key data, project status, purchase approvals, and everything else they need to stay connected and productive - in real-time - on the jobsite.

Have Questions?

Be sure to get in touch if you have questions or want to see a demo of any of these new industry-specific complementary solutions that are designed to extend the functionality of your core Sage X3 software.

SAGE X3 VIDEO LEARNING SERIES

A series of over 60 new how-to videos are now available on YouTube that walk you through some of the new and notable features introduced in Sage X3 Version 11. In this article, we'll highlight a few of those videos that we think might be of interest to you.

Overview of Sage X3 Version 11
