

AUTO-GENERATE P.O'S FROM WORK ORDERS

The Auto Generation of Purchase Orders from Work Orders enhancement utilizes the Primary Vendor from Inventory and the Quantity Required for WO when creating Purchase Orders to meet manufacturing demand. The system appropriately links the WO and PO lines when Purchase Orders are generated.

Summarized Like Items feature, Costing Hierarchy selection and an exception Log is provided as to why certain records weren't selected.

Auto Generate PO's From WO's

Selections

Select Field	Operand	Value
Work Order	Range	0095092 0095094
Parent Due Date	All	
Parent Item Code	All	
Planner Code	All	
Buyer Code	All	

Use the Selection to pare down the WOs shown in the first box below.

About Scanco

Since 1989, Scanco has been a leading provider of supply chain automation software and services. Since our inception, we have focused on innovative warehouse management solutions with a unique technology-driven approach. Our solutions deliver unequaled efficiency and visibility for distribution and manufacturing companies around the globe.

From basic barcoding to the most complex distribution and manufacturing operations- Scanco software is positioned to grow with our customers ever-changing business needs. We are focused on providing top-tier, fully integrated automation solutions built specifically for your ERP solution. Today, thousands of world-class distribution and manufacturing companies have automated their facilities with cutting-edge Scanco technology.
