management.

PROCESSWEAVER

— INTEGRATED SHIPPING PERFECTED —

www.processweaver.com

About ProcessWeaver

For more than a decade, ProcessWeaver has developed, deployed and supported enterprise transportation management technology that is used by tens-of-thousands of shippers in more than 90 countries.

Recognized in Gartner's *Magic Quadrant for Transportation Management*, and certified by major global carriers such as UPS and FedEx, ProcessWeaver focuses exclusively on helping companies of any size better manage the complexities of multi-carrier and

multi-modal shipping through its robust transportation management platform which can be deployed on-premise or hosted in the cloud.

Our experience and expertise help deliver on the commitment that shippers make to their customers; getting their orders to them at the time and place they need.

There is a reason tens-of millions of orders are shipped each year on systems provided by ProcessWeaver.

Things we do

Software

Services

Support

Transportation Management Software

ProcessWeaver develops industry leading transportation management software that is designed to operate as an extension of your critical business systems such as ERP, WMS, and e-Commerce. Its robust functionality and modular design offers shippers of any size a platform to help them improve their transportation and logistics processes. Regardless of your shipping volume, how simple or complex your processes, or where you ship from in the world or to, we're worth a look.

Professional Services

ProcessWeaver's professional service staff has years of transportation, process improvement, technology, systems integration experience and expertise. ProcessWeaver is CMMI-Level 3 Appraised, so you can be assured of our obligation to continually offer the most advanced project management, development, and communication services, all of which results in projects being delivered on time and on budget.

24/7/365 Customer Support

ProcessWeaver believes that its software product is only as good as our ability to support it. Our CMMI-Level 3 Appraisal drives support methodology and allows us to offer industry-leading service level agreements. Shipping is mission critical, and we understand that every order must be shipped so that it gets to your customer at the time and place they need it.

Things we do

www.processweaver.com

Rating & Routing

ProcessWeaver's platform provides you with a single repository for all your carrier rates and routing rules, which enables you to accurately rate, rate shop, consolidate, and optimally route shipments, all to reduce transportation costs and improve customer service.

Logistics Data Quality

Prior to physically shipping products, ProcessWeaver's platform ensures that the logistics-related data it receives from ERP or WMS is as accurate as possible. It does this by validating shipping addresses, international, and hazmat data, as well as perform such tasks as denied parties screening.

Shipping Execution

ProcessWeaver provides carrier compliant shipping execution for more than 220 global carriers and logistics services providers which include: Parcel, Less-Than-Truckload, Full Truck Load, Freight Forwarders, Private Fleet, Same Day Couriers, Air, and Ocean.

Things we do

www.processweaver.com

Labels & Documents

Transportation is still very paper-based. To streamline and improve documentation, ProcessWeaver's platform produces all necessary internal, carrier, customer, and regulatory agencies mandated shipping labels and documents.

Carrier Tendering

After shipping and labeling, ProcessWeaver automatically tenders shipments to your chosen carriers through our Shipping Information Gateway (SIG), which connects you to more than 220 global carriers and logistics service providers.

Track & Trace

Once a carrier picks up your freight, ProcessWeaver attaches a "visibility tether" to each tracking number, pro number, or airway bill and monitors its transit activity all the way through to Proof of Delivery, alerting you to supply chain exceptions when they occur.

Inbound Supplier Shipping

In addition to helping you plan and execute your outbound shipping, ProcessWeaver TMS platform provides you with a web portal that helps you with vender compliance, making available a system where they can ship inbound to you or drop ship to your customers.

Reporting & Analytics

Transportation and logistics touch every part of an organization. The information related to the movement of goods from physical plant to customers can dramatically influence how you improve operations and your company's bottom line. ProcessWeaver can help you make better sense of this data.

Global Trade

In addition to planning and execution, ProcessWeaver also provides solutions to help facilitate your global trade activities, including denied parties screening and filing your export information through such governmental systems as ACE and ATLAS

Things we do

www.processweaver.com

Hazmat Shipping

ProcessWeaver's TMS platform enables you to comply with both carrier and regulatory agencies when shipping dangerous goods. Our solution helps ensure compliance and prints all required labels and documents.

Mobile TMS

Mobile TMS provides shippers with the ability to better manage the shipment and delivery of their products on their own fleet or with carriers who are unable to provide supply chain information on the movement and delivery of their products, including POD information and signatures.

Freight Auditing

In a perfect world you wouldn't have to concern yourself with carriers not invoicing you exactly what you think you should be paying for freight. But the world is not an error-free zone and you need to look at this information at transactional level. ProcessWeaver helps you with this task.

xCarrier for Sage ERPs

ProcessWeaver has more than a decade of experience working with businesses that run Sage ERP to help them improve transportation processes and reduce costs. Our TMS platform operates as an extension of Sage 100, 300, 500, and X3, so there is no need for complicated integration with external 3rd party systems. In addition to delivering the TMS functionality described elsewhere herein, Sage ERP processes can be automated, and users benefit from, transportation information (such as tracking number and freight amount) that is updated in Sage with each sales order or delivery.

Supported Carriers

ProcessWeaver's TMS platform supports more than 220 global carriers and logistics service providers in more than 90 countries. So, whether you ship same day couriers, parcel, truckload, full truckload, utilize freight forwarders, ship via aircraft or ocean vessel, our platform ensures you comply with their requirements for rating, labeling, document printing, tendering, and track and trace. Our powerful Shipping Information Gateway (SIG) connects you to ProcessWeaver's carrier network so you can quickly onboard new carriers as you need them.

If you happen to use a carrier that is not in our network, not to worry. Let us know who they are and ProcessWeaver will add them at no cost to you.

ABOUT OUR SUPPORT

PROCESSWEAVER BELIEVES THAT OUR SOFTWARE IS ONLY AS GOOD AS OUR ABILITY TO SUPPORT IT. WE ALSO UNDERSTAND THAT SHIPPING IS MISSION CRITICAL AND ITS UNACCEPTABLE WHEN AN ORDER THAT IS SUPPOSED TO SHIP DOESN'T.

For more than a decade, ProcessWeaver has supported some of the biggest shippers in the world. Because of that, 24/7/365 support is not an option, but our standard. Our CMMI Level 3-driven support provides our customers with the quickest response times in the industry. No matter where or when you ship, if you have an issue, ProcessWeaver help is minutes away.

Our support also includes quarterly business reviews which ensures that we always understand your business and how best ProcessWeaver can align with it.

OUR GOAL

ProcessWeaver's goal is to build, deploy, and support the best transportation technology on the market. Additionally, our goal is not to be just a technology provider, but rather your technology partner.

We understand that you make commitments to your customers, and the technology you use to get them their orders at the time and place they need them must align with existing processes, integrate with your critical business systems, but also be flexible to adjust to the changing conditions of your business as you compete in a global market.

To this end, ProcessWeaver's entire global staff is committed to helping you improve operational efficiencies, improve accuracy, and reduce transportation costs; while at the same time ProcessWeaver wants to be a partner that's easy to do business with.

OUR THINKING

We know you have a choice when it comes to selecting a TMS technology provider

ProcessWeaver wants to be your TMS technology partner. To that end, we are committed to assisting you at every stage of your evaluation process. That includes investing the time to understand your business, transportation and logistics processes, and IT landscape. It also includes getting you with information you need to thorough review our company, products, and services. This includes demonstrations, technical discussions, cost justifications, and more.

Let us help you get to know us better.
