Healthcare delivery today requires a fundamentally different approach and a new breed of physician leaders who can lead their organizations through the shift from volume- to value-based healthcare delivery.

Join us for an opportunity to watch the presentation from the ACPE Annual Meeting on *Emerging Requirements for New Physician Leadership Skills & Fundamental Lessons from the Field*. Interact with the presenters who will share their experiences in developing leaders during this paradigm shift toward value-based delivery.

OBJECTIVES

- Understand how reform is impacting the need for physician executives to become change agents at varying levels in an organization
- Understand the critical success factors required for physician leaders to transform their organizations
- Learn tactical development strategies to enable physician leaders to drive transformational change from three perspectives (i.e. leaders of physicians, leaders of care teams, and health system leaders)

AGENDA

- Introduction
- Current Physician Leadership Challenges & Opportunities
- Roadmap to High Performing Physician Leadership
- Tactical Strategies for Developing Physician Leaders
- Q&A
