

Take Enviance with you, even without an Internet connection. Increase productivity, improve data quality, become more efficient.

Be flexible, productive and more efficient - go mobile.

With the Enviance Environmental ERP System you can access many features via a personal digital assistant (PDA), tablet PC, or laptop – bringing all the benefits of being in the cloud to personnel in the field. By accessing Enviance anywhere, anytime via a mobile device, you can increase productivity, improve data quality and save time.

TRACK AND CAPTURE **Data From Anywhere**

Enter, edit, or delete data, and complete or dismiss tasks – all within the Enviance Mobile Platform – allowing you to enter data for meter readings, inspections, assessments, and incidents. The Mobile Platform makes paperless inspections possible and simplifies field data collection during follow-ups to regulatory inspections and incident investigations. Entering data in the field eliminates the hassle and inaccuracies of recording information with a pen and paper and then transferring that data to a spreadsheet database accessed from your workstation. With Enviance, you have the ability to efficiently track information and capture data on the spot with a handheld mobile device.

Enter the information once in your mobile device – which then synchronizes directly to your Enviance System. This process is more efficient and improves data quality by eliminating the manual transcription errors typically associated with moving data from paper to electronic form.

Potential uses for the mobile platform include:

- Self assessments
- Audits
- Zone inspections
- Regulatory inspections
- Walk-downs
- Material releases
- Spills/incidents

COMPLIANCE ASSURANCE **At Your Fingertips**

The Enviance Mobile Platform extends the capability of your EERP solutions, integrating your day-to-day field operations with your overall compliance activities.

- Single point of data entry
- Consistent data entry look and feel to Enviance
- Enhanced data integrity, smaller margin for error
- Paperless
- Immediate field documentation of data collected
- Identification of corrective action tasks in the field

And, with the Enviance Mobile Platform, you spend less time collecting data – in fact, one Enviance customer increased efficiency by 10%!

SYNCHRONIZATION **Is Quick and Easy**

By having access to your Enviance solutions in the field, where an Internet connection may not be available, you will be able to record accurate information for later synchronization. The synchronization process will refresh your Enviance System, download tasks, refresh event templates, and also upload any cached data that had been entered previously. Synchronization can be done with wireless Wifi, cellular Internet, or through a wired docking station.

IMPLEMENT and Realize Benefits Faster Than Ever

Enviance is a robust and economical solution, providing powerful and flexible functionality. You can implement the Enviance Mobile Platform fast – which means that you can start assuring compliance and improving performance quickly.

- Reduce time spent in the field by streamlining data collection
- Improve data quality by eliminating transcriptional errors when transferring data from paper
- Lower data management costs by entering information only once in your centralized Environmental ERP System
- Increase the productivity of your organization by utilizing resources more efficiently

SAVE Time and Money

With more than 10 years of environmental expertise, the Enviance Environmental ERP System is the industry's first platform developed using cloud computing technology.

The unrivaled functionality of Enviance's cloud-based system reduces costs and complexity at every step – from collecting and collating data to report generation – whether you're at your desk or in the field.

- Eliminate spreadsheet errors by deploying a consistent, reliable, and standardized database solution
- Maintain a central repository that collects and stores data once, and reports it multiple times - reducing the time, cost, and risk associated with handling data multiple times
- Deploy verifiable and transparent data collection and calculation methodologies providing confidence in the data and information reported to key stakeholders
- Easily connect other information systems reducing the inefficiency associated with manual transcription and aggregation
- Realize a lower Total Cost of Ownership (TCO) with proven cloud computing

ENVIRONMENTAL ERP

Environmental ERP meets the unique and evolving business need to measure, understand, report on and mitigate a company's impact on the environment – providing a comprehensive understanding of environmental performance within the broader business context.
