Pwnie Express Announces the Ultimate Tablet for Cyber Security Professionals

The Pwn Pad 4, Pwnie's latest commercial-grade penetration testing device, is the ultimate tablet for security professionals and is now integrated with Pulse, the Pwnie Express SaaS platform. The standalone Pwn Pad provides the best penetration testing tools in the palm of your hand and when used as part of our Pulse SaaS Platform, provides reporting and analysis within the Pulse console.

Whether you take it on the road or use it at your company, you have a full pentesting suite in your hand and full visibility in Pulse.

Core Features

- Full integration with Pwn Pulse platform
- Includes Blue Hydra, the industry's first device discovery software capable of detecting low power and classic Bluetooth devices
- Easy-to-use Android front-end with configuration wizard, stock Android apps, and customized one-touch Pwnie Express penetration testing apps
- Kali Rolling with comprehensive penetration testing suite
- Pwnie Express OTA updates
- High performance CPU/GPU, large display, powerful battery
- External USB-Ethernet adapter for wired network penetration testing
- Includes USB OTG cable (for USB host-mode) and protective tablet case
- Support for additional USB accessories
