TECHNICAL BULLETIN

SUBJECT: LiFT Pack S8 Product Announcement

Flux Power is announcing two changes to our UL Listed LiFT Pack battery for pallet jacks. We are simplifying our LiFT Pack offerings while at the same time expanding them!

1. We have combined our S5 and S7 into our new S8 universal design.
2. The smallest capacity LiFT Pack S8 95Ahe (72Ah) is now UL listed.

Visit www.ul.com/database and search for Flux Power to see all of our listings.

The new S8 makes ordering a LiFT Pack even easier. Give us the truck make and model, and we'll make sure the pack has the appropriate mounting mechanism and weight. With the current design, the LiFT Pack S8 fits most major pallet jack brands.

Effectivity Date

The change to the product line is effective immediately.
