

King's-Edgehill School

# WEEKEND PROGRAMMING

Whether on or off campus, there is always a wide range of fun activities to choose from throughout the weekend at KES. King's-Edgehill's convenient location makes it easy to tap into events happening in the city of Halifax, at various nearby universities, and in unique towns in the surrounding area. Being able to offer a balance of culture, arts, sports, shopping, and entertainment means that there is truly something out there to suit everyone's interests!

Weekend activities and off campus trips are advertised in advance so students can plan their free time accordingly. These activities are not compulsory; any students who wish simply to catch up on their work or even just relax, may do so.

Some popular weekend activities include: day trips to the shopping centres and movie cinemas of Halifax, visiting historic Peggy's Cove and Lunenburg, attending concerts and plays at Acadia University or in Halifax, attending Ted Talks, Mermaid Theatre performances, enjoying a live sporting event (Acadia University, Halifax

Mooseheads, Harlem Globetrotters, etc.), recreational skiing and snowboarding, local festivals, hiking, sugar shack visits, sampling specialty restaurants, cooking and baking lessons on campus (highlighted by the opportunity to learn to cook a variety of different dishes from around the world), playing intramural soccer and basketball on campus, sledding, campus campfires, ping-pong tournaments, karaoke, board games night, etc.

We also offer casual trips on the weekend where a teacher may take a handful of students hiking or biking the local trails.

Our students can even do their Driver Training program through the school. Students who wish to participate in the Driver Education Program must hold a valid Learner's Permit. Students who wish to take the program must register with the School Receptionist in September. Parents must provide written consent that their son or daughter may enroll in the program.

Throughout the year we offer Special Interest Programming based on student interest. Programs like: Firearm Safety Courses, Open Water Certification in Scuba Diving, Ski Patrol and others.
