A-Team's Take on the Regulatory Challenge

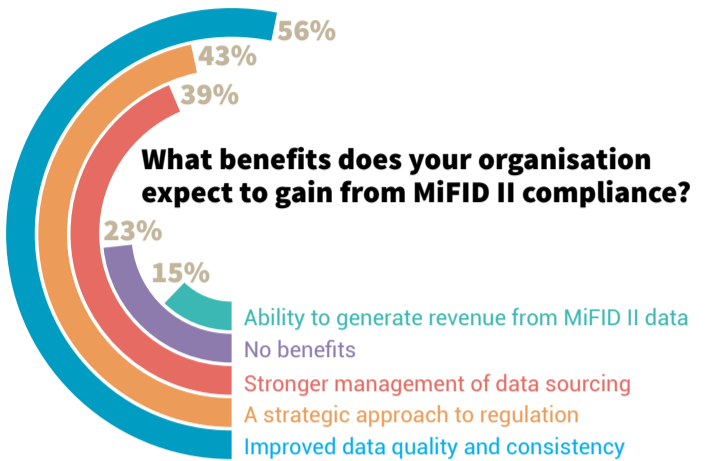

Markets in Financial Instruments Directive II (MiFID II)

The scope of MiFID II brings with it significant challenges across various aspects of the regulation. Data sourcing, data quality, data access could be eased with the application of RegTech.

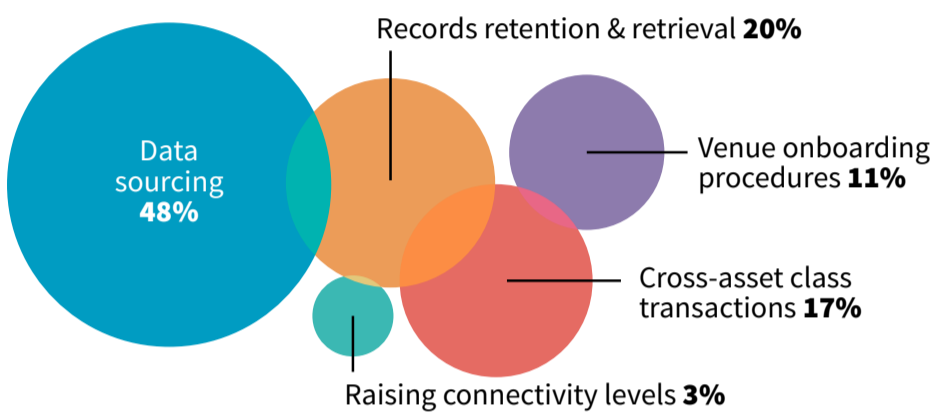

How ready is your organisation to meet the obligations of MiFID II?

At your organisation, which elements of required MiFID II data are proving difficult to source?

What part of the best execution provisions will be most challenging?

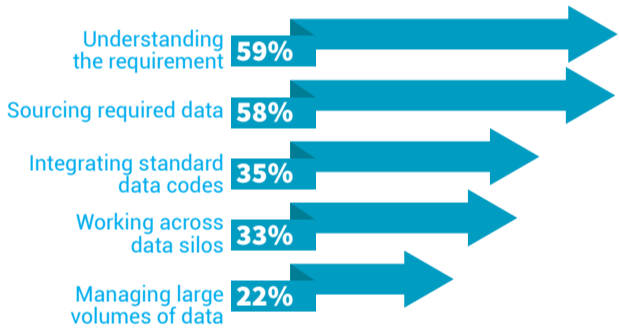

MiFID II success is based on understanding your data and being able to extract it for best execution, reporting and record keeping.
