Astrata

Connecting data on the move
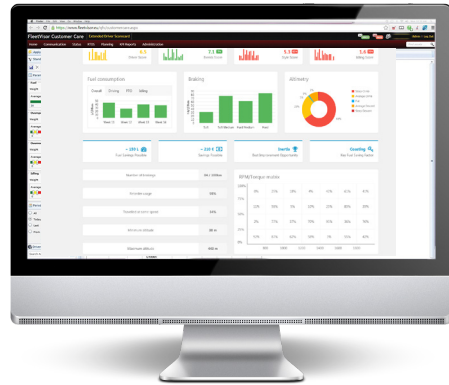

Astrata's leading software solutions

FleetVisor

The smartest way to focus on fleet management

FleetVisor® is a powerful web-based platform which gives a clear overview of all trucks and trailers in real time. It allows your fleet managers to take full control over fuel consumption, driver hours administration and back-office performance improvement. It shows you all vehicles' and drivers' performance metrics in clear figures and simple graphics - everything you need to know to optimize all your transport activities and increase operational efficiency.

Main benefits for your business:

- Reduced operational costs
- Increased utilisation of all your fleet assets
- Increased drivers' performance and productivity
- Improved security of your vehicles, drivers and cargo, and increased transport safety
- Increased customer satisfaction

TripMonitor

The smartest way to focus on your loads

TripMonitor® offers you up-to-date information about location and trip progress from subcontractors, enabling you to have full visibility of all your outsourced loads and trips regardless of the telematics system. It operates on a management-by-exception basis, providing visibility of trips that are not aligned with the planning.

Main benefits for your business:

- Monitor all transport movements through automated load tracking
- Improve your on-time delivery performance by focusing on the movements that need your attention
- Increased customer satisfaction
- Improved load security through proactive notifications of load status issues
- Maximize your operating results
- Evaluate subcontractor performance in detail
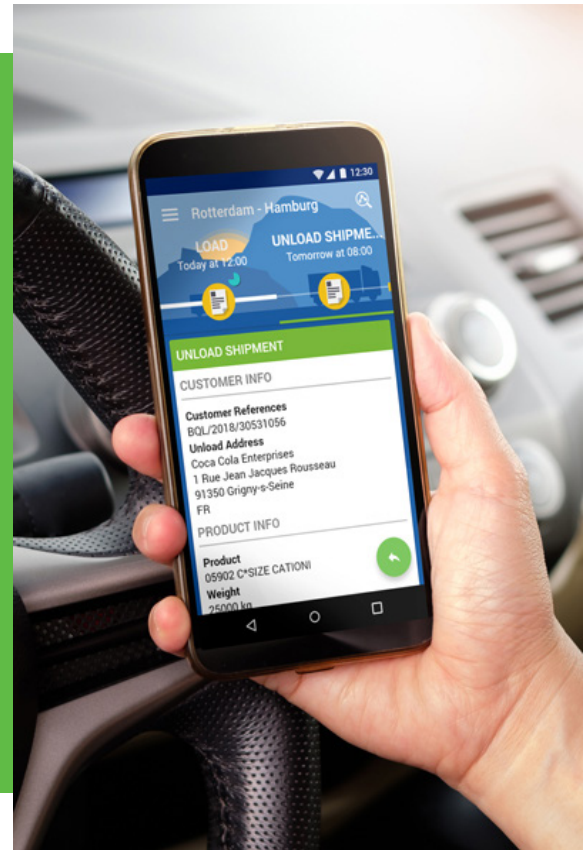

Astrata's innovative mobile applications

Mission Planner

The smartest way to focus on your assignments

Mission Planner is a stand-alone workflow management application bringing structure to your process flow. It ensures that you have all the right information organized in the required format and sequence. We offer a complete representation of your workflow with Mission Planner.

Main benefits for your business:

- Independence from any hardware or software in use - Mission Planner is a stand-alone application integrating and processing data
- Full flexibility and customization according to your process flow and needs
- Improved data processing thanks to the intelligence behind the process flow structure
- The ability to include multiple media files in various formats in two-way communication

AppLinc

The smartest way to focus on your subcontractors

AppLinc® allows you to stay connected with everyone who is driving for you, so you have immediate insight in their location and control the effectiveness of the subcontracted trip. AppLinc is available in Google Play.

Main benefits for your business:

- No investment or installation costs
- Increased back-office performance
- Real-time overview of activities of all drivers as well as location of your loads.
- Improved communication and ease of sharing information and status with subcontractors
- Display of the optimal route, reduction of mileage and toll road tariffs in FleetVisor.

# Astrata's advanced mobile workforce & driver productivity solutions

VanLinc

The smartest way to focus on your mobile workers

VanLinc® offers comprehensive fleet and mobile workforce management capabilities: from asset monitoring, driver behaviour and workflow management, job planning to route control and analytics. With powerful integration and reporting, VanLinc can help your business achieve new levels of operational excellence.

Main benefits for your business:

- Monitor asset and employee activity with precision and ease
- Connect every element - assets, employees and customers
- Seamlessly integrate with all other operational software
- Use VanLinc's simple analytics to better inform your business
- Achieve operational excellence and exceed customer expectations

DriverLinc

The smartest way to focus on your drivers

State-of-the-art interface for your drivers regarding orders, messaging, alerts, scanning and coaching. DriverLinc® is a combination of Astrata's leading driver interface software and TomTom Navigation packed in a robust tablet. DriverLinc display family is a generation of high-end driver displays with Astrata's dedicated user interface with a variety of software applications.

DriverLinc+® can be used out-of-cab and its camera allows you to scan documents, capture images and digital signatures. Astrata App Store is available on DriverLinc tablet, from which drivers can download and install available and approved applications.

Main benefits for your business:

- Real-time overview of all driver hours and Working Time/Driving Time directive with alerts and notifications to avoid penalties
- Advanced driver coaching for fuel management and safety
- Simplified communication and order management with real-time data processing
- Possibility to scan transport documents or take pictures with built-in camera
- Best-in-class truck navigation with real-time traffic information

# Astrata's state-of-the-art 3rd party integration service & HGV solutions

DataLinc

The smartest way to connect any data

DataLinc, the open telematics service provided by Astrata, utilizes data generated by various 3rd party devices and sensors in and around the vehicle to provide information to the customer regarding vehicle movements, asset (vehicle, trailer, and driver) status, temperature information, and provides reporting functionality in a single platform.

Main benefits for your business:

- Integrates 3rd party data into a single platform
- Reduces the complexity of monitoring different data sources on multiple interfaces
- No downtime for vehicles (fast execution through software integration)
- No employee training costs for different software programs

TrailerLinc

TruckLinc

TrailerLinc

The smartest way to focus on your trailers

TrailerLinc® is a black box solution that tracks the location and utilization of all your trailers in real time, all the time.

Main benefits for your business:

- Improves trailer productivity, increases utilization
- Reduces the risk of cargo theft
- Ensures cargoes are heading to the right destination
- Notifies customers of delivery status
- Provides real-time 3PL/4PL cargo visibility

TruckLinc

The smartest way to focus on your trucks

TruckLinc® represents the new generation black box solution to manage commercial vehicles fleets more efficiently.

Main benefits for your business:

- Full integration with FMS and Tachograph
- Increases safety and security of drivers, vehicles and cargo
- Increases fleet productivity with minimized downtime and maintenance costs
- Improves back-office performance by reducing administration
- Automatic remote tachograph downloads and easier compliance with changing regulations
- Provides real-time 3PL/4PL cargo visibility

About Astrata

Astrata is a software company with strong foundations in geolocation, telematics and fleet management. We deliver solutions that streamline transport, logistics and supply chain operations and mobile workforce management. Relied upon by over 1200 global customers, we help you operate at peak performance by improving efficiency and profitability, and increase safety and security.

We ensure seamless integration of telematics with software solutions while connecting three strategic pillars: extracting data; adding intelligence; and providing information. We collect data from vehicles, trailers, sensors, and data regarding drivers, goods, locations; process this data by adding our know-how and intelligence to deliver meaningful information on different platforms to help you manage your business and operations.

We bring the future to today and make it work, make sure it keeps working and help your company accelerate.
