Astrata Europe TalentLinc

We are looking for Android-Java Software Engineer
40 hrs. (M/F)

Astrata Europe: We are the European leader of innovative telematics services. We deliver our services to your local plumber, international transport companies and multinational shipping companies. Want to know what they have in common?

Our culture: We are a diverse team, highly skilled and experienced, working in an innovative and ambitious environment. Our open working environment encourages collaborative working across teams and ensures information flows around the business. Be open to cooperating with colleagues from all over the globe and thrive in an inspirational environment. Like to join our mix to create innovative solutions?

Your challenge: Add your value to a company where the impact of your work is visible to you, your colleagues and our customers. Work in a closely-knit team where you will be challenged to be proactive, creative and responsible. Can you deliver the goods?

The job:
Develop innovative applications that provide business value to our costumer. Be part of a great team of developers and grow together to develop yourself and the next generation of business applications.

Your successes:
- Working in the whole application development process: requirements analysis, participation in user story reviews and task breakdown and, of course, the development,
- Collaborate with cross-functional teams to define and design new features,
- Continuously discover, evaluate, communicate and implement new technologies to maximize development efficiency,
- Being responsible for ensuring quality and security of the application. Drive our efforts to adopt the best practices to build an innovative, stable and maintainable product,
- Ensure best possible performance, quality and responsiveness of the enterprise-grade applications,
- Provide technical assistance to customer support teams and customers when needed.

Your skills and experience:
Minimum Job requirements:
- 3-5 years of programming with Android SDK and Java,
- Knowledge of full mobile development life cycle,
- Knowledge about Hybrid applications (e.g React Native), including knowledge about JavaScript
- Experience with Git and Agile Methodologies, using some tools like Jira,
- Knowledge of Automatic Testing.

The following knowledge and skills are considered a plus:
Spring (Spring Boot), WebServices, Android low level (kernel) knowledge, Continuous Integration tools.

Your competencies:

Initiative, results oriented, communication, team work, client focus, accountability, innovation, creative thinking, quality focus, continuous learning.

Our offer:
- Be part of a motivated team,
- Work with great technology,
- Good office location.

Remuneration: Salary will be based on experience and skills.

Work location: Madrid.

Application:
Do you want to get connected to Astrata Europe B.V.? Please send your application to Loek Charpentier, HR Manager, (lcharpentier@astrata.eu) and include your motivation for this position and your CV.

Acquisition or solicitation by recruitment agencies is not desired.
