

itBit offers powerful bitcoin trading services built for financial institutions and trading professionals. Our services include a global bitcoin exchange and OTC trading desk. itBit is based in New York, with an international office in Singapore.

Background

itBit launched in November 2013 as an innovative digital asset exchange led by CEO and co-founder Charles Cascarilla. In May 2015, itBit received a trust company charter from the New York State Department of Financial Services (DFS) and became the first company to operate a regulated bitcoin exchange in the United States. In October 2015, itBit launched a global OTC agency trading desk, making it the first company in the space to offer both a bitcoin exchange and OTC desk.

Business Model

itBit's robust bitcoin trading services were purpose-built for institutional and active traders. Traders on the company's global bitcoin exchange in the U.S. and around the world have access to deep liquidity, low fees and robust API services. itBit's OTC desk offers a deep orderbook, personalized trading support and competitive pricing.
