

ENHANCING YOUR EFFECTIVENESS AS A VIRTUAL LEADER

Leading a team of diverse employees with constantly changing needs is challenging enough. When those employees are located in different geographies, where face-to-face contact is limited, priorities are constantly shifting, and there is little time to address their individual needs, you can begin to understand why leading virtual employees is one of the most difficult jobs in business today.

Enhancing your Effectiveness as a Virtual Leader provides leaders with an opportunity to evaluate their knowledge of what it takes to be an effective virtual leader and assess the extent they are currently using behaviors that differentiate the most effective virtual leaders.

PROGRAM OBJECTIVES:

- Recognize and manage the key challenges virtual leaders face
- Learn the characteristics that differentiate high-performing virtual leaders
- Understand your leadership style and how it impacts your ability to lead from a distance
- Assess your knowledge of effective virtual leadership, or “your virtual leader IQ”
- Clarify your personal learning objectives and create a development plan

AGENDA:

- Recognize and manage the key challenges virtual leaders face
- Learn the characteristics that differentiate high-performing virtual leaders
- Understand your leadership style and how it impacts your ability to lead from a distance
- Assess your knowledge of effective virtual leadership, or “your virtual leader IQ”
- Clarify your personal learning objectives and create a development plan
