

# CYBER RISK MANAGEMENT EVALUATION TOOL

	GREEN	YELLOW	RED
<p><b>CYBERSECURITY OWNERSHIP</b></p> <p>Does overall ownership of cybersecurity rest with senior executives rather than remain solely within the IT function?</p>			
<p><b>CYBERSECURITY FRAMEWORK</b></p> <p>Has the asset manager established a relevant cybersecurity framework, tailored to its needs?</p>			
<p><b>DATA CLASSIFICATION</b></p> <p>Has the asset manager identified and classified all its data and defined appropriate security requirements to protect it?</p>			
<p><b>USER ACCESS</b></p> <p>How is access to the asset manager's data and IT resources granted and managed?</p>			
<p><b>DATA, NETWORK AND HARDWARE SECURITY</b></p> <p>What security controls does the asset manager use to protect its data and IT resources?</p>			
<p><b>CHANGE MANAGEMENT</b></p> <p>Are procedures standardized to efficiently handle changes to the manager's IT software and hardware infrastructure?</p>			
<p><b>PERSONNEL</b></p> <p>Does the asset manager have sufficient personnel dedicated to cybersecurity activities?</p>			
<p><b>VULNERABILITY AND PATCH MANAGEMENT</b></p> <p>Does the asset manager proactively evaluate vulnerabilities and ensure that security patches are applied on a timely basis?</p>			
<p><b>INCIDENT RESPONSE</b></p> <p>How prepared is the manager to handle cybersecurity incidents?</p>			
<p><b>SECURITY AWARENESS AND TRAINING</b></p> <p>How does the manager maintain cybersecurity awareness throughout its company?</p>
