

Chemically Resistant Precast Concrete Liner System

Introducing *XR QuikLiner*, Seaman Corporation's Chemically Resistant Precast Concrete Liner system. Utilizing XR technology - known for its chemical and puncture resistance - *XR QuikLiner* is fully adhered to concrete in the casting stage via integral fiber backing. Pre-fabricated liners with welded seams create a watertight barrier, extending the lifespan of concrete products.

Excellent for Waste Water Management Applications. Protects against Corrosion, including MIC.

Flexible & prefabricated to fit your forms. Minimal labor, and no messy application.

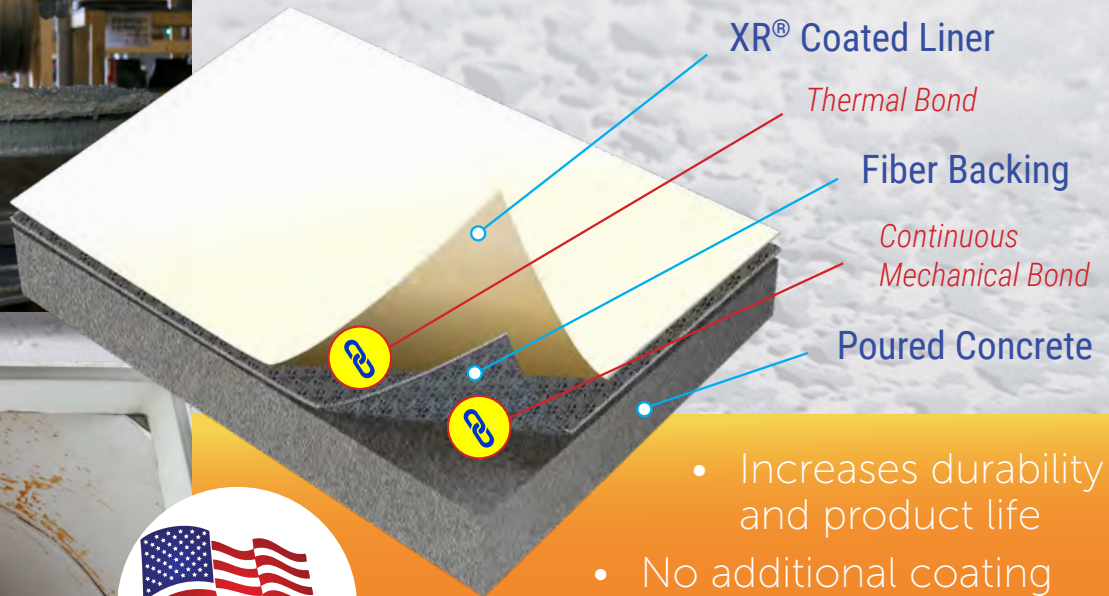

Incorporates XR® technology for excellent chemical resistance, including H₂S gas

PLACE.

POUR.

PERFORM.

- Increases durability and product life
- No additional coating required
- Prefabricated to fit your forms
- American made, quality guaranteed

Using **XR QuikLiner**
By Seaman Corporation

PREFABRICATED LINER

PLACE. POUR. PERFORM.

1

Seaman Corporation's *XR QuikLiner* is custom made to fit your formwork.

2

1 With your specifications, Seaman Corporation prefabricates the liner to fit your form. The liner is folded, packaged and shipped ready to use.

2 Simply **PLACE** the liner on your form and...

3 **POUR** the concrete.

4 Once set, the tank is removed from the form with the *XR QuikLiner* bonded to the concrete, ready to **PERFORM!**

* Liner detailing, if needed, can be completed with hot air welding.

3

XR QuikLiner is Better Than HDPE:

- Prefabricated to fit your form
- Can be folded for shipment
- Continuous adhesion to the concrete
- Fits corners and pipe penetrations

4

XR QuikLiner is Better Than Epoxy:

- Cast in the product - no waiting!
- No special surface preparation needed
- No special weather considerations
- Minimal waste - No mess or single-use tools
