

Are you ready for GDPR?

The new General Data Protection Regulation (GDPR) will significantly impact data governance for organizations worldwide. The intent of this comprehensive set of privacy regulations is to protect personal information for individuals within the European Union (EU). Even if your organization is not based in the EU, odds are you're going to need to comply. Does your organization:

- Handle personal data that is collected in the EU, controlled by an organization in the EU or is processed by an organization in the EU?
- Have over 250 employees that are doing business with individuals in the EU?
- Engage in large-scale, ongoing processing of personal data?

If you answered yes to any of these, then you need to get ready!

DATUM's GDPR Solution does the heavy lifting so you don't have to. We provide the experts, the formula, the methodology and the assets you need to successfully comply with the new regulation. We'll help you create transparent and demonstrable best practices and put those to work:

- Defining what data can be classified as GDPR personal information
- Discovering where this data lives, who uses it and how it is used
- Connecting that information to data governance processes
- Enabling collaboration with all stakeholders across the organization
- Supporting engagement with regulators

Our GDPR Solution consists of two key components:

GDPR READINESS ASSESSMENT & ROADMAP ENGAGEMENT

This service assesses privacy data management practices and identifies areas that will create compliance risk. Following the assessment, a capability roadmap will be prepared detailing a path to remediation and GDPR compliance.

DATUM INFORMATION VALUE MANAGEMENT® FOR GDPR

This special edition of the Information Value Management® platform ensures that you are not starting from scratch. Our GDPR edition comes preconfigured with GDPR base processes, rules, standards, data and other assets, such as templates and frameworks, which will assist you in instilling governance as a process discipline and automating GDPR compliance management ecosystem wide.

BENEFITS

Reduce Risk and Fines

Institute a systemic approach that provides demonstrable due diligence and audit readiness for regulators and minimizes the potential for penalties for noncompliance- which can be as high as 4% of gross revenues.

Connect Data to Compliance

Link GDPR-related processes, rules, standards, data and metrics to your organization's compliance goals and objectives.

Build Trust with Stakeholders

Demonstrate to customers that personal information is handled appropriately.

DATUM's Information Value Management® adds several layers of defense for regulatory engagements. Now we have the ability to engage with regulators in a timely and cost effective manner.
