	of		
Single-stage, close-coupled, volute twin-head nump with in-line suction and discharge ports of	; of		
identical diameter. The twin-head pump is designed with two parallel power-heads. The pump the top-pull-out design, i.e. the power head (motor, pump head and impeller) can be removed f maintenance or service while the pump housing remains in the pipework.	۱r		
Each power head is fitted with an unbalanced rubber bellows seal. The shaft seal is according EN 12756. Pipework connection is via PN 16 ANSI flanges. Pipework connection is via PN 16 ANSI flanges.	С		
Each power head is fitted with a fan-cooled, permanent-magnet synchronous motor of identica size. The motor efficiency is classified as IE5 in accordance with IEC 60034-30-2. The motor includes a frequency converter and PI controller in the motor terminal box. This ena continuously variable control of the motor speed, which again enables adaptation of the performance to a given requirement.	les		
Further product details Wireless communication between the two power heads is quickly and easily obtained. The pur heads can be set to cascade mode, alternating mode or duty/standby.	р		
The operating panel on the motor terminal box features a four-inch TFT display, push-buttons a the Grundfos Eye indicator.	nd		
The display gives an intuitive and user-friendly interface to all functions. The push-buttons are used to navigate through the menu structure to access pump and performance data on site a enable setting of required setpoint as well as setting of pump to "Min." or "Max." operation or "Stop".			
Communication with the pump is also possible by means of Grundfos GO Remote (accessory) The remote control enables further settings as well as reading out of a number of parameters s as "Actual value", "Speed", "Power input" and total "Power consumption".	ıch		
 The Grundfos Eye indicator on the operating panel provides visual indication of pump status: "Power on": Motor is running (rotating green indicator lights) or not running (permanently green indicator lights) 			
 "Warning": Motor is still running (rotating yellow indicator lights) or has stopped (permanently yellow indicator lights) "Alarm": Motor has stopped (flashing red indicator lights). 			
Pump Pump housing and pump head are electrocoated to improve the corrosion resistance. Electrocoating includes: 1) Alkaline-based cleaning.			
2) Pretreatment with zinc phosphate coating. Printed from Grundfos Product Center [2020.02.003]

ount	Description					
	Motor					
	The motor is a totally enclosed, fan-cooled motor with principal dimensions to IEC and DIN standards. Electrical tolerances comply with IEC 60034.					
	The motor requires no external r	put 20 mA, 0-5 V, 0-10 V, 0.5 - 3.5 V				
	The terminal box holds terminals - one dedicated digital inpu - two analog inputs, 0(4)-20 - 5 V voltage supply to pote					
	 one configurable digital in Grundfos Digital Sensor i 	tal input or open-collector output sor input and output for sensors uts (potential-free contacts) communicate via wireless GENIair or wired GENI connection
