

It works with a standard air separator

*Combines Two (2) 50-Year-Old Technologies
Tangential + Coalescing Separation*

Just Insert **SweepCLEAR®** Coalescing Media
into Tank thru Tank Inlet to Create a High-
Performance Air & Dirt Filter/Separator

- Removes Micro Air Bubbles - **Stopping Corrosion & Increasing Energy Efficiency**
- **Cleans water by Removing Dirt** that Fouls Chillers, Boilers, Valves, Strainers & Heat Exchangers
- **Saves water.** Clean water does not have to be flushed
- **Retrofit** Your AS for **1/3rd the Cost** of a New Coalescing Air Separator , **2 to 36"**
- Typically, 1-day Installation with **NO Pipe Modifications**
- Media is **PERMANENT**, made from 304 SS welded fine wire
- **NO Increase** in Pressure Drop
- Works on Hot, Chilled & **Condenser Water** Systems, **2 to 36"**
