

FIRST ON-SITE LEGIONELLA DNA TEST

Prevent outbreaks with early detection

SPARTAN LEGIONELLA DETECTION SYSTEM

- Medical-grade DNA testing platform applied to environmental sector
- qPCR technology precisely quantifies amount of Legionella in 45 min
- Detects all *Legionella pneumophila* serogroups
- Detects live and not dead bacteria using proprietary technology
- Test potable and non-potable water sources
- Validated according to ISO 12869
- Avoid false negative results
- Calibrated so that 1 GU/mL = 1 CFU/mL
- Local or cloud-based data storage, reporting, and analytics
- Manufactured in a medical-grade ISO 13485-certified facility
- Expandable platform, additional environmental tests being released
