

Yes! We Know DELL BOOMI

The acceleration of in-cloud app use has caused data silos to spring up in organizations everywhere. The result is an ocean of disconnected data that's difficult to leverage or align with business outcomes. The new mandate: Integrate or get left behind.

THE iPaaS SOLUTION

One place businesses are turning to solve the integration dilemma is the iPaaS (Integration Platform as a Service) industry. Dell Boomi, a pioneer in the iPaaS industry, is leading the way into this new world of low-code, centralized, AI-driven integration solutions.

To better serve our Kronos clients, Improv now offers Dell Boomi platform integration for both **Workforce Ready** and **Workforce Central**.

SO WHAT'S A BOOMITE?

A Boomite is a Kronite who has been around the Boomi block and experienced the power of integration in the workplace. A Boomite is a true believer, a top fan, the one who wears the colors and carries the torch for efficiency and data sharing.

A Boomite is strangely productive and fiercely focused because they know data is king. And while others search aimlessly — you can bet — Boomites already grabbed the data. There's an untapped Boomite in all of us. Knocking on siloed doors for access. Eager for information. Aching for integration.

Are you ready to release your inner Boomite? We can help.
