

We believe when you mix technology and creativity just about anything is possible.

We believe when people feel empowered to do their jobs well – free of obstacles and cumbersome protocols – happiness flows and profit grows.

***The Improv Approach:***

TECHNOLOGY + CREATIVITY = ENDLESS POSSIBILITIES

We believe when you put the right people on a complex problem, a fresh, powerful custom solution is closer than you might think.

**1. WE UNDERSTAND THE BIG PICTURE**

We take the necessary time to get a complete picture of your organization's structure, strategy, and workforce goals.

**2. WE DIVE INTO YOUR CULTURE**

We dive into your processes, your people, and your culture so that your solution echoes the heartbeat of your organization.

**3. WE ASSESS BEFORE SOLVING**

We study and analyze what's working, what's not, and how to maximize your Kronos software to visibly impact your outcomes.

**4. WE PRODUCE HIGHLY CREATIVE SOLUTIONS**

We've earned our creative stripes. Our consultants are top-tier industry experts who can see beyond the hardware to a customized implementation strategy that works for you.

**IMPLEMENT RIGHT, OR IMPLEMENT TWICE.**

*Direct Cost of Operations*  *Total Cost of Errors*  *Cost of Control*  *Total Cost of Ownership*

FACTS

- Most organizations only consider the Direct Cost of Operations, which means they are entering into a high-risk scenario by not leveraging the power of their Kronos system.
- Most companies experience a 17% loss in productivity due to unsuccessful user adoption strategies. (What would a 17% increase in productivity mean to your company?)
- Right now you are losing money in project and error costs — perhaps a lot of money. When you hire the Improv team you immediately stop the leak and strengthen your ROI.
- The Improv Approach is designed to deploy your application faster and with less risk, which can immediately reduce operational costs.
- Most Kronos users aren't maximizing their horsepower. Our case studies prove it time and time again: The money you save by reducing errors and increasing functionality is a mathematical win.

***What are you waiting for? Let us show you what's possible! Let's get started today!***
