

Data Breach Response

We recognize that organizations do not have unlimited funds to spend on detecting and responding to cyberattacks. Organizations that suspect a breach are often working against the clock to assess if their data was accessed so they can make informed decisions regarding next steps.

METHODOLOGY

The Crypsis Group consultants work with our clients and their internal teams to swiftly and efficiently identify, contain, and eradicate threats. We strive to provide answers quickly; to limit the amount of time data from victim networks is exposed to attackers; and to help our clients resume normal business operations as expeditiously as possible.

Crypsis I.C.E. Methodology™

SERVICES

Digital Forensics	Identify the root cause of an incident by peeling back evidence layers to understand the scope of the compromise.
Log Analysis and Enterprise Wide Sweeping	Verify unauthorized access and determine the vulnerabilities exploited and methods used.
Malware Analysis	Perform deep analysis to determine full capability of malware, develop custom intelligence, and deploy signatures to hunt for malware throughout the organization.
Breach Coaching	Leverage the experience gained working on teams who have responded to data breaches to provide guidance through the incident.

BREACH RESPONSE RETAINER SERVICES

When a breach is suspected, your organization is often forced to react in a rush. Time is critical, so we put in place a trusted advisor who can guide you through the steps that must be taken to make informed decisions in the wake of a cybersecurity incident.

The Crypsis Group offers retainer options designed to provide clients with the peace of mind that they have a trusted advisor at the ready to aid them in making clear decisions and providing answers to stakeholders with confidence.

Standard Level Retainer

The Standard retainer is a zero-dollar investment option that allows you to have legal paperwork in place so that if an incident occurs we are able to immediately begin work helping you identify the scope of the incident and mitigate the damage attackers can do inside your environment.

Premier Level Retainer

In addition to having the legal paperwork in place, the Premier retainer provides clients with a Breach Readiness Review (BRR), and a pool of 80 included hours. Should an investigation exceed 80 hours, additional hours will be offered at a discount.

Clients with a Premier retainer in place will receive guaranteed remote support within 48 hours and, if necessary, on-site support within 72 hours of a confirmed incident.

WHY CRYPISIS

✓ Breadth of Knowledge

Members of The Crypsis Group team have responded to and managed investigations of complex data breaches at global organizations across multiple industries. We have responded to data breaches of all shapes and sizes and are experienced at responding to compromises involving cloud based applications and enterprise applications. Furthermore, we have experience responding to attacks by nation-state actors, insiders, and thieves looking to steal PII, PCI, and PHI data.

✓ Operational Expertise

We are operational security experts. We know how to spot malicious threat actors and what to do to prepare for the worst. Our team understands that effective security programs improve an organization's security posture without compromising the functional needs of the business. We work with our clients to provide actionable and realistic recommendations to achieve those objectives.

✓ Perspective

We understand what our clients go through. Our consultants have been on teams that responded to some of the largest commercial data breaches on record. We bring lessons learned to each of our engagements, offering clients insights into how to deal with the components one must deal with when preparing for and managing an incident.

✓ Security for Every Budget

We believe organizations of all sizes should have access to the expertise they need to be as secure as they can be. We work with our clients to establish a budget that makes sense for them.
