

## Crypsis Splunk® Services Portfolio

Splunk utilizes machine data to provide IT organizations with near real-time operational and business intelligence. With Splunk, you can reduce detection time for problems and security events. Add in analytics, correlation, and visualizations and you'll have the power to drive better informed business decisions. However, Splunk is only as powerful as the insights and knowledge you derive from it, and getting the most out of an implementation can be challenging due to any number of constraints.

The Crypsis Group's team of Splunk Advisors have an aggregate 25 years of experience providing personalized Splunk support, delivering technical solutions, and creating business processes for organizations of every size. We offer a number of services that are highly customizable, allowing us to work with your organization to build a program tailored to its unique needs.

### **SPLUNK HEALTH CHECK**

As part of our Splunk Health Check, we will perform a deep dive review of your implementation and provide tactical and strategic recommendations for optimization. Combining our Advisor's real world experience with knowledge of Splunk's best practices, we will review open support cases, and identify performance issues and other potential risks. Our Advisor's recommendations will help you streamline your environment and better prepare for future growth and scalability.

### **SPLUNK IMPLEMENTATION SERVICE**

The Splunk Implementation Service provides expert design and installation services for a variety of Splunk products. Our Splunk Advisors work with your team to gain a thorough understanding of your business needs, use cases, and capabilities to design an implementation strategy that best fits your business requirements and organizational constraints. Our Advisors are certified Splunk Architects, engineers, and security experts who can implement the following Splunk products:

- Splunk Enterprise
- Splunk Cloud
- Splunk Light
- Splunk Hunk
- Splunk Enterprise Security

### **SPLUNK DASHBOARD DEVELOPMENT AND SUPPORT**

Our team of Splunk Advisors leverage their real world experience in Operations, the Software Development Life Cycle (SDLC), and Security and Business Intelligence; helping you organize your data and build dashboards that provide the most comprehensive view into your business operations. Whether it is providing the C-Level team with a "Single Pane of Glass" to help them understand business trends or providing your security team the views required to detect and respond to sophisticated threat actors, a Crypsis Splunk Advisor can help visualize your operations and augment your monitoring strategies.

## SPLUNK ADVISOR RETAINER

The Crypsis Group understands the challenges your business faces are not always predictable. Our Splunk Advisor Retainer puts a Splunk Advisor at your finger tips to help with technical challenges when you need us most.

The Crypsis Group provides two types of Retainer to best fit the needs of your business.

- **Standard Splunk Advisor Retainer**

The Standard Splunk Advisor Retainer is a zero-dollar retainer that establishes a contract with agreed upon rates. This removes the burden of negotiating a contract during the times you need urgent assistance.

- **Premium Splunk Advisor Retainer**

The Premium Splunk Advisor Retainer includes discounted support hours and a Splunk Health Check. The bundled approach helps drive your return on investment and integrates a Crypsis Splunk Advisor into your environment to maximize their impact.

## WHY CRYPISIS

- ✓ **Operational Expertise**

We are operational security experts. We have stood up SOCs and run those operations. We know how to spot malicious threat actors and what to do to prepare for the worst. We understand that effective security programs improve the organization's security posture without compromising the functional needs of the business. We work with our clients to provide actionable and realistic recommendations to achieve those objectives.

- ✓ **Security for Every Budget**

We believe organizations of all sizes should have access to the expertise they need to be as secure as they can be. We work with our clients to establish a budget that makes sense for them.

## Contact Us to Learn More About The Crypsis Group
