BOSTON WINDOW + SAFETY

We Believe

That safety must be a top priority.

Other than Motor Vehicle accidents, falls are the number one killer of workers in this country. Our founder, Reg Ranahan, had seen too many falls throughout his many years in the Window Washing industry; thus, the premise to start a safer window cleaning company staffed with highly trained personnel. Having been a Vietnam Veteran, Reg was highly trained in safety procedures.

In carrying on this vision and standard of safety, each and every employee in the high rise department at BWS is professionally trained in self-rescue.

As end users of our own fall protection systems, we care about the lives of all workers, because they are not just employees—they're our brothers, our sons, and our friends.

**Expect no less from us.
Safety is our priority.**

MOST COMMONLY ASKED QUESTIONS YOU ASKED, WE ANSWERED.

Q: Do you do high rise window cleaning?

A: Yes - We clean both high-rise and low-rise.

Q: What's the best time of year to clean my windows?

A: The short answer is, "Whenever you want them to be clean". A good exterior window cleaning can stay looking great for about three months, on average. Contrary to what many believe, windows aren't really affected by the weather. Most of the dirt you see on windows is actually a result of car exhaust, acid rain, and atmospheric debris in the air. Many people wait for the last snowfall when the parking lots are finally swept, and the snow is over. But you actually don't have to wait. Having clean windows increases employee morale, which in turn, increases productivity in the workplace.

Q: Do you do interior window cleaning?

A: BWS Corp. provides interior and exterior cleaning.
