Why is it better for you to work with one company to do both technology audits and consulting?

Working with an extra vendor adds more conversations, more contractual frustration, and the focus being on vendor relationships instead of where it can be which is making your organization secure.

What would the obstacle be if you want to work with a company who does both?

At Vala Secure there is no obstacle. There is no legal requirement to use separate companies. Our clients understand our processes and have been successful in passing exams and adding regulated clients.
