

Consulting Services

Data Integration Services

Maximize the return on your investment with Ignite's ETI Data Integration Consulting Services. From custom development and product best practices to outsourcing of an entire data integration project, our team of industry experts will ensure you get superior value from your technology investment.

Business Benefits

- Accelerated implementation time
- Best practices to help you quickly enhance your implementation
- Ability to add application functionality more quickly
- Predictable cost and outcomes

Achieve Maximum Impact From Your Technology

The benefits of big data are evident across today's business landscape. The ability to house and analyze large amounts of data is providing businesses with better insight, cost savings and creating new opportunities for companies large and small. An important part of leveraging big data is effective and efficient data integration architecture and design.

ETI, a pioneer developer of ETL (Extract, Transform and Load) software acquired by Ignite Technologies in 2015, brought significant consulting talent to the table. With the integration into Ignite's culture, focused on customer success, the final product is guaranteed to deliver client satisfaction.

Ignite's ETI consultants have designed and implemented customized data integration solutions for both Fortune 500 clients and mid-sized growth companies on almost all standard platforms. We augment your existing staff in whatever manner is required, delivering creative and focused solutions to ensure you meet your objectives and realize real value within the shortest amount of time possible and lowest risk.

Our implementation methodology provides the delivery of Ignite's ETI solution with methods that enable us to meet your unique organizational needs, while ensuring the successful implementation of your ETI solution.

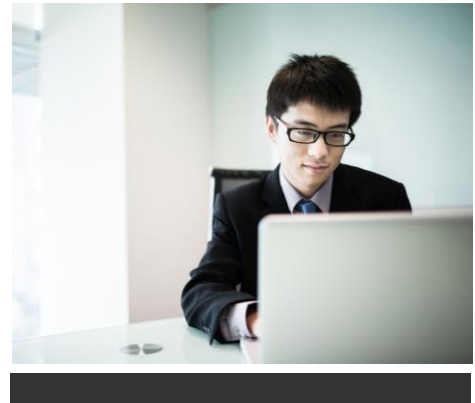

We developed it, we know it.

Let our team of experts make you successful.

Implementation and Consulting Services

Get your Ignite ETI solution up and running quickly and efficiently. Here are just a few things our experts can help you with.

- Requirements Gathering & Analysis
- Design/Optimize Control Flows
- Design/Optimize Data Flows and ETL processes
- Maximize Flexibility Using Variables and Configurations
- Design and Create Customized Business Logic for Transformations
- Load Data into Data Warehouses (Incremental Loads of Fact and Dimension Tables)
- Extract Data from a Variety of Data Sources
- Configurable Error Handling and Notification
- Integration of Data From Multiple, Heterogeneous Data Sources
- Data Cleansing and Profiling to Improve Data Quality
- Master Data Management
- Metadata Management to Trace Data Lineage, Audit Data and Perform Impact Analysis
- Management of Information Throughout Its Life-Cycle To Enhance Governance and Compliance
- Complex Data Transformations (Summary, Aggregation, Filtering, Splitting from one Source to Multiple Destinations)
- Extract or Load Data from Legacy Systems
- Performance Tuning

Ignite's ETI consultants have designed and implemented customized data integration solutions for both Fortune 500 clients and mid-sized growth companies on almost all standard platforms.

Data Integration as a Service

Have your Ignite ETI solution hosted, managed and maintained on your behalf. You provide the data integration requirements and we'll do the rest. Bring immediate results to the entire organization by utilizing ETI consultants to design, develop, deploy, monitor and maintain the data integration programs on your behalf.

Education Services

Client education is key to your success. Rely on Ignite's ETI solution courses to build a solid foundation of knowledge that can be put into action right away. Our education experts are skilled in course design, course delivery and effective communications.

How it Works →

1. Submit a request for Consulting Services on our Support Portal at <https://support.versata.com> where your request will be directed to the appropriate team and the information gathering stage will begin.
2. After your specific needs are discussed, a time and materials quote will be delivered. Please note that our time and materials consulting services are available based on a minimum project size of 150 hours.
3. Once the quote is signed, a Statement of Work will be created and service will be initiated.
4. Our team will methodically deliver the service, ensuring you are satisfied before, during and after service delivery, providing you with opportunity to give us feedback upon completion.
