

TOOLS OF THE TRADE

BlazeMaster® Fire Protection Systems are backed by the FBC™ System Compatible Program – the original and most comprehensive chemical compatibility program in the industry.

Knowing the right ancillary products to use while planning or installing a CPVC fire sprinkler system shouldn't have to be a guessing game. BlazeMaster Fire Protection Systems makes it easy, 24/7.

START NOW: To know which products can come in contact with CPVC pipe and fittings, ask yourself...

WHAT CPVC PIPE AND FITTINGS SYSTEM ARE YOU USING?	BlazeMaster Fire Protection Systems	Spears FlameGuard®
WHAT PRODUCTS ARE COMPATIBLE?	Go to the FBC System Compatible Program (online or via smart device apps) to view more than 100 approved products, updated daily	Go to the Spears online compatible products finder, which lists fewer products, updated at an unknown frequency
DIDN'T FIND THE PRODUCT?	Go to the FBC System Compatible Program list of incompatible products (online or via smart app)	Not found online – Contact the company
STILL DIDN'T FIND THE PRODUCT?	Go to the FBC System Compatible Program Other Chemical Compatibility Topics. Look for the category of the product being applied. Specific information can be found on many categories of products that intentionally or accidentally come in contact with CPVC	Not found online – Contact the company
STILL DIDN'T FIND THE PRODUCT?	Contact BlazeMaster CPVC (blazemaster.com/support) or the product manufacturer	Not found online – Contact the company

Third-party testing and auditing for all listed products to BlazeMaster CPVC specs are based on a deep understanding of chemistry – a foundational competency of Lubrizol. We also provide proactive and historical communications of any changes within the FBC System Compatible Program – the gold standard for compatibility in the industry.

FBC
SYSTEM COMPATIBLE

FlameGuard® is a trademark of Spears Manufacturing.

The FBC™ System Compatible Program is a resource made available to manufacturers of ancillary products intended to be used with CPVC to help determine whether a product is chemically compatible with Lubrizol's FlowGuard®, BlazeMaster®, Corzan®, and products made with TempRite® Technology. Other manufacturers and/or brands of CPVC piping have not been tested as part of the FBC™ System Compatible Program. The FBC™ System Compatible program is, therefore, only applicable to the chemical compatibility of ancillary products with the Lubrizol brands of FlowGuard®, BlazeMaster®, Corzan®, and products made with TempRite® Technology. This distinction is made because every brand of CPVC piping is made with unique compounds, some of which may contain resins with different molecular weights and varying chlorine content. These characteristics directly impact the performance of the resulting product. Similarly, various CPVC products contain different performance additives. This too affects the performance characteristics of the ancillary product. For these reasons, Lubrizol has no responsibility for any failures occurring as a result of using products in the FBC™ System Compatible Program with CPVC products other than FlowGuard®, BlazeMaster®, Corzan®, and products made with TempRite® Technology.
